| 6 | **Note 1**: This adjustment reflects the imprudence impairment consistent with the final order in NMPRC Case No. 22-00270-UT. For GAAP accounting purposes, this impairment was recorded to FERC Account 116 "Other Electric Plant Adjustments"; however for regulatory purposes, this adjustment is reclassified into FERC Account 101, to properly remove the amounts from rate base. |
| 7 | **Note 2:** The Palo Verde Asset Retirement Costs, recorded in plant in service, are not included in rate base, as final decommissioning of PV are ultimately funded to an external trust, and recovery of decommissioning expense from PNM Retail customers are based on those funding amounts. This treatment is consistent with prior rate cases. |
| 8 | **Note 3**: Adjustment reflects reclassification of capital assets at the end of the Base Period associated with Palo Verde Leased Capacity. Leased Capacity assets approved to be recovered as through regulatory assets have been reclassified to the Regulatory Asset Workpapers. This adjustment is consistent with the treatment in the Final Order of NMPRC Case No. 22-00270-UT. |
| 9 | **Note 4:** Reflects capital investment on Shared Services that are allocated to subsidiaries other than PNM. See WP Plant - 8, columns T, U and V for Base Period allocation to PNM. The allocation of Shared Services is based on the 13-month average at the end of the Test Period. For the Test Period, the 13-month average was calculated on a total company basis prior to the allocation of assets to PNM. Please refer to WP Plant - 8, columns BD, BE and BF for Test Period allocation to PNM. |
| 10 | **Note 5**: FERC accounts 365 (Overhead Conductors and Devices), 366 (Underground Conduit) and 367 (Underground Conductors and Devices) are allocated between Primary and Secondary System Distribution based on conductor footage study. See WP Plant -1 for allocation percentages. Also see the Direct Testimony of PNM witness Gray for further discussion on the conductor footage study. This note relates to information grouped within the outline function and is not visible on the printed schedule. |
| 11 | **Note 6**: Information in Column B "Location Number" is utilized to identify the applicable depreciation rates. |
| 12 | **General Notes**: |
| 13 | Please see the Direct Testimonies of PNM Witnesses Gray, Flores-Olivas, Sanchez, Phelps, and Gutierrez for discussion of adjustments/changes to the Base Period, Test Period. |
| 14 | Please see WP Plant - 1a for variance between adjusted Base Period and Test Period balances. |
| 15 | The electronic version of this worksheet uses the Microsoft excel outline function. This function groups the elements of cost, and or columns for print formatting purposes. |

| 5 | Note 1: PNM forecasts the amortization of nuclear fuel as nuclear fuel expense, based on AURORA projections. See PNM Exhibit RNG-4 WP Fuel-6 for assumptions on nuclear fuel amortization. | | |
| 6 | | | |
| 7 | **General Note**: The forecasted activity in nuclear fuel inventory for the Test Period and Linkage data is based on projections provided by APS (operator of Palo Verde) and reflect PNM's share. Please refer to the testimony of PNM Witness Wesley Gray for discussion of nuclear fuel activity. Anticipated use of nuclear fuel based on APS operational outage schedules. | | |

See WP Plant -1 for allocation percentages. Also see the Direct Testimony of PNM Witness Gray for further discussion on the conductor footage study. This note relates to information grouped within the outline function and is not visible on the printed schedule. |
| 9 | **Note 2**: Information in Column B "Location Number" is utilized to identify the applicable depreciation rates. |

| 6 | **Note 1**: This adjustment reflects the imprudence impairment consistent with the final order in NMPRC Case No. 22-00270-UT. For GAAP accounting purposes, this impairment was recorded to FERC Account 116 "Other Electric Plant Adjustments"; however for regulatory purposes, this adjustment is reclassified into FERC Account 101, to properly remove the amounts from rate base. |
| 7 | **Note 2:** The Palo Verde Asset Retirement Costs, recorded in plant in service, are not included in rate base, as final decommissioning of PV are ultimately funded to an external trust, and recovery of decommissioning expense from PNM Retail customers are based on those funding amounts. This treatment is consistent with prior rate cases. |
| 8 | **Note 3**: Adjustment reflects reclassification of capital assets at the end of the Base Period associated with Palo Verde Leased Capacity. Leased Capacity assets approved to be recovered as through regulatory assets have been reclassified to the Regulatory Asset Workpapers. Assets associated with the sale of certain assets to SRP are removed to account for this sale transactions. This adjustment is consistent with the treatment in the Final Order of NMPRC Case No. 22-00270-UT. |
| 9 | **Note 4:** Reflects capital investment on Shared Services that are allocated to subsidiaries other than PNM. See WP Plant - 8, columns T, U and V for Base Period allocation to PNM. The allocation of Shared Services is based on the 13-month average at the end of the Test Period. For the Test Period, the 13-month average was calculated on a total company basis prior to the allocation of assets to PNM. Please refer to WP Plant - 8, columns BA, BB and BC for Test Period allocation to PNM. |
| 10 | **Note 5**: FERC accounts 365 (Overhead Conductors and Devices), 366 (Underground Conduit) and 367 (Underground Conductors and Devices) are allocated between Primary and Secondary System Distribution based on conductor footage study. See WP Plant -1 for allocation percentages. Also see the Direct Testimony of PNM Witness Gray for further discussion on the conductor footage study. This note relates to information grouped within the outline function and is not visible on the printed schedule. |
| 11 | **Note 6**: Information in Column B "Location Number" is utilized to identify the applicable depreciation rates. |
| 12 | **General Notes**: |
| 13 | Please see the Direct Testimonies of PNM Witnesses Gray, Flores-Olivas, Sanchez, Phelps, and Gutierrez for discussion of adjustments/changes to the Base Period, Test Period. |
| 14 | Please see WP Plant - 1a for variance between adjusted Base Period and Test Period balances. |
| 15 | The electronic version of this worksheet uses the Microsoft excel outline function. This function groups the elements of cost, and or columns for print formatting purposes. |

| 83 | Note 2: 85.49% of revenues are subject to franchise tax at a rate of 2.84%. 84.79% of revenues are subject to gross receipts tax at a weighted average rate of 7.52%. | | | | |
| 84 | Note 3: During PNM's final review, it was identified that the working capital balance was not updated in RNG-3 to reflect the latest changes shown in this workpaper. Updating this would result in a net increase to the Base Rate Revenue Requirement of $30.6 thousand. PNM elected not to update due to the significance of the re-work and and because not updating this results in a customer benefit. | | | | |

| 6 | **Note 1:** PNM does not forecast changes to Materials and Supplies or Prepayments, except for ROW balances, Palo Verde, and Transmission Deferral. Therefore, Linkage and Test Period balances agree to the 13-month average | | | |
| 7 | calculated for the base period. | | | |
| 8 | **Note 2**: San Juan Generating Station ("SJGS") costs are removed from the base period. This adjustments reflects the abandonment of SJGS as authorized in NMPRC Case No. 19-00018-UT. | | | |
| 9 | Note 3: PNM specifically forecasted Palo Verde working capital balances. Please see PNM Exhibit RNG-4 WP WC-2 for | | | |
| 10 | Palo Verde working capital balances for Linkage and Test Periods. | | | |
| 11 | **Note 4:** Navajo ROW treated as lease under FERC and GAAP accounting. Balance of annual payment is comprised of | | | |
| 12 | an annual base payment of $6,000,000 plus a CPI adjustment. The base payment is treated as a lease and recorded | | | |
| 13 | to operating lease assets and the CPI adjustment is recorded to account 165000. In order to reverse the impacts of lease accounting, PNM is adding back the average balance of the prepayment of the base payment. This is consistent with the treatment in NMPRC Case No. 22-00270-UT. | | | |
| 14 | Note 5: ROW balances are forecasted based on current amortization schedules and forecasted renewals. Please refer to PNM Exhibit RNG-4 WP OM-15 and WP OM-16 for ROW balances in the Linkage and Test Period. Also, please | | | |
| 15 | refer to the testimony of PNM Witness Flores-Olivas for discussion of ROW renewals. | | | |
