3	Lead Sheet										
4											
5	Note 1: Regulatory assets are recovered through rate riders outside of base rates, therefore, PNM has removed them for rate base.										
6	Note 2: Please see the direct testimony of PNM Witness Morris for the calculation of the Investment Tax Credit "ITC" and Excess Deferred Income Tax Regulatory Liabilities. Amortizations of the Regulatory Liabilities are reflected in Federal Tax Adjustments.										
7	Note 3: Removed Grid Mod regulatory assets as they are recovered through Rider 60.										
8	Note 4: Removed the SJGS Final ETA Decommissioning Regulatory Asset from rate base as it will be requested in a future rate case once decommissioning is complete.										
9	Note 5: Removed the portion of PVNGS undepreciated investment regulatory asset for which PNM was authorized return of, but no return on in NMPRC Case No. 22-00270-UT.										
10	Note 6: Removed the SJGS Plant Decommissioning Regulatory Asset from rate base as PNM is granted a return of, but no return on the regulatory asset balance.										
11	Note 7: Monthly amortization expense reflects expenses from the Base Period. For PCB Refinancing Hedge amortization, please refer to WP ORB-11.										
12	Note 8: Change is due to monthly amortizations.										
13	Note 9: Start of amortization of PVNGS regulatory assets as approved in NMPRC Case No. 22-00270-UT.

PNM Exhibit RNG-4 Supporting Revenue Requirements Workpapers

WP ORB- Other Rate Base Workpaper

Is contained in the following 33 pages.

	A	B	C	D	E
1	**PNM Exhibit RNG-4**				
2	**WP ORB-Lead Sheet**				
3				***Provides Information To***	***Requires Information From***
4	***Tab Reference***	***Description***	***Purpose***	***Tab name***	***Tab name***
5	WP ORB-1	Other Rate Base-Base Period, Test Period, and Linkage Data	Provides a summary of Other Rate Base items for the Base Period, Test Period and Linkage data.	PNM Exhibit RNG-3 - WP COS.xlsx; COS Base Adj, COS Test, WP OA-Other Allowable Exp Workpaper.xlsx; WP OA-3	WP ORB-2, WP ORB-3, WP ORB-4, WP ORB-6, WP ORB-7, WP ORB-8, WP ORB-9, WP ORB-10, WP ORB-11, WP ORB-12, WP ORB-13, WP ORB-14, WP ORB-15, WP ORB-16, WP ORB-17, WP OA-Other Allowable Exp Workpaper.xlsx; WP OA-3,WP OM-O&M Workpaper.xlsx; WP OM-13, WP OM-15, WP OM-16, Manual inputs
6	WP ORB-2	Customer Deposits and Injuries & Damages - Base Period 13 Month Average	Calculates a 13 month average of Customer Deposits and Injuries & Damages for the Base Period.	WP ORB-1	Manual inputs
7	WP ORB-3	Summary of Projection ARO Accretion Expense	Month to month accretion expense summary of the ARO Liabilities-Production locations, including San Juan, Luna, Lordsburg, Afton, Reeves, Four Corners, and Algodones for the Linkage data and Test Period.	WP ORB-1, WP ORB-5	Manual inputs
8	WP ORB-4	ARO Accretion Schedule for Distribution	Month to month accretion schedule of the ARO Liability-Distribution for the Linkage data and Test Period.	WP ORB-1, WP ORB-5	Manual inputs
9	WP ORB-5	Summary of ARO Accretion Expense in Linkage and Test Period	Summary of ARO accretion expense in the Test Period, including: Test Period Expense, Adjusted Accretion Expense and Requested Accretion Expense.	WP OA-Other Allowable Exp Workpaper.xlsx; WP OA-1	WP ORB-3, WP ORB-4, PNM Exhibit RNG-3 - WP COS.xlsx; PNM Exhibit RNG-3 COS Test
10	WP ORB-6	Summary of Non-Qualified Retirement Plan	Summary of the Non-Qualified Retirement Plan amounts for the Linkage data and Test Period.	WP ORB-1	Manual inputs
11	WP ORB-7	Amortization of FERC Incremental Rate Customer Deposits	Amortization of High Lonesome Mesa and Western Spirit for the Linkage data and Test Period.	WP ORB-1	Manual inputs

	A	B	C	D	E
1	**PNM Exhibit RNG-4**				
2	**WP ORB-Lead Sheet**				
3				***Provides Information To***	***Requires Information From***
4	***Tab Reference***	***Description***	***Purpose***	***Tab name***	***Tab name***
12	WP ORB-8	Summary of Prepaid Pension Asset	Summary of the prepaid pension asset for the Linkage and Test Period data.	WP ORB-1, WP ORB-10	Manual inputs
13	WP ORB-9	Summary of Prepaid Pension Asset-Shareholder Excess Cash	Summary of excess shareholder cash contributions for the prepaid pension asset for the Linkage data and Test Period.	None	WP ORB-10, Manual inputs
14	WP ORB-10	Prepaid Pension Asset Cost Benefit Analysis	Presents the prepaid pension asset cost benefit analysis.	WP ORB-9	WP ORB-1, WP ORB-8, PNM Exhibit RNG-3 WP COS.xlsx; A5-Test
15	WP ORB-11	Unamortized Loss on Reacquired Debt	Summary of unamortized loss on reacquired debt for the Linkage data and Test Period.	WP ORB-1, WP OA-Other Allowable Exp Workpaper.xlsx; WP OA-1, WP RA-Reg Asset & Liab workpaper.xlsx; WP RA-1	Manual inputs
16	WP ORB-12	Summary & Amortization of 2027 Rate Case Expenses	Summary of 2027 Rate Case Expenses and calculates amortization for the Test Period.	WP ORB-1, WP OA-Other Allowable Exp Workpaper.xlsx; WP OA-1	Manual inputs
17	WP ORB-13	Amortization of Tucson Electric Power ROW Deferral	Amortization of Tucson Electric Power ROW Payment for the Linkage data and Test Period	WP ORB-1, WP OM - O&M Workpaper.xlsx; WP OM-4	Manual inputs
18	WP ORB-14	Possessory Interest Tax Amortization Calculation	Amortization of Possessory Interest Tax for the Linkage data and Test Period	WP ORB-1	Manual inputs
19	WP ORB-15	Pathnet Activity Calculation	Summary of Pathnet Activity for the Linkage data and Test Period	WP ORB-1, WP OA-Other Allowable Exp Workpaper.xlsx; WP OA-1	Manual inputs
20	WP ORB-16	ESA Damages	Summary of ESA Damages Activity for the Linkage data and Test Period	WP ORB-1	Manual inputs
21	WP ORB-17	FERC 893 Cyber	Calculates FERC 893 Cyber amortization and balances for Linkage data and Test Period	WP ORB-1	Manual inputs
22

	A	B	C	D	E	F	G	H
1	**PNM Exhibit RNG-4**							
2	**WP ORB-1: Notes**							
3	Lead Sheet							
4								
5								
6	**Note 1:** Based on the Test Period in this case, pursuant to the FTY Rule, PNM is precluded from seeking recovery of CWIP and RWIP in the Test							
7	Period. Therefore, PNM has removed these balances to develop the Adjusted Base Period.							
8	**Note 2:** The Palo Verde Asset Retirement Obligations ("ARO") are not included in rate base, as final decommissioning of PV is ultimately funded to							
9	an external trust, and recovery of decommissioning expense from PNM Retail customers are based on those funding amounts. This treatment is consistent with prior rate cases 22,00270-UT, 16-00276-UT, 15-00261-UT and 08-00273-UT. Amount agrees to book balance as of December 2023.							
10								
11	**Note 3:** PV Dry Cask Storage balances reflect a non-cash liability on the books and records of PNM, and therefore are removed from the cost of							
12	service. This treatment is consistent with prior rate cases.							
13	Note 4: PNM removed ARO Balances associated with SJGS as these costs are collected under the Energy Transition Charge and are no longer collected through base rates. This is consistent with the treatment in NMPRC Case No. 22-00270-UT.							
14	**Note 5:** Please see WPs ORB-3 and ORB-4 for a summary of Production and Distribution Accretion expenses by month in the Test Period. Change is							
15	based on set accretion schedules.							
16	**Note 6:** Change is due to amortizations from Adjusted Base Period to Test Period.							
17	**Note 7:** Please see WP OM-15 & WP OM-16 for amortizations of existing ROW balances and projected ROW renewals.							
18	**Note 8:** Please see WP ORB-11 for loss on reacquired debt balances and amortizations.							
19	**Note 9:** Proposed and estimated final costs incurred to the 2027 Rate Case to be recovered from 10/31/2027 onwards							
20	**Note 10:** Please see WP ORB-16 for ESA damages balances and amortizations.							
21	**Note 11:** Please see WP ORB-17 for FERC 893 balances and amortizations.

20						
21	Total Accretion Expense	11,508,132	3,487,828	3,499,634	3,555,408	
22						
23	Base Period Adjustments:					
24	Remove PVNGS Accretion Expense Excess of Funding level	(8,253,087)				WP OA-1, line 14, Col. D
25	Remove SJGS related Accretion Expense (excluding 65 MW)	-				WP OA-1, line 14, Col. E
26	Total Base Period Adjustments (Production)	(8,253,087)				WP OA-1, line 14, Col. F
27						
28	Adjusted Base Period Accretion - Production (Excluding 65 MW)	**3,135,220**				WP OA-1, line 14, Col. G
29						
30	Determination of PVNGS Base Period Adjustment - Note 1					
31	ARO - Accretion Expense - Palo Verde	9,553,087				
32	PNM Retail Share - Generation Demand Allocator	100%				WP RNG-3 COS Test, column J, line 790
33	PNM Retail Share of Accretion Expense	9,553,087				
34	Funding Requirements for Palo Verde Unit 3	1,300,000				Note 3
35	Adjustment to funding level approved in 16-00276-UT	(8,253,087)				WP OA-1, column D, line 14
36						
37						
38	Note 1: Palo Verde Decommissioning and ARO recovery is based on funding amounts. PNM includes the funding portion in its cost of service. PNM has reflected the change to accretion expense at Palo Verde for informational purposes only, as the funding amount in the Test Period does not change. Please refer to the testimony of PNM Witness Agrawal.					
39	Note 2: Please refer to WP ORB-4					
40	Note 3: Authorized recovery of $1.3M annually in Paragraph 30 of the Modified Stipulation approved in Case No. 13-00390-UT.

PNM Exhibit RNG-4 Supporting Revenue Requirements Workpapers

WP WC- Working Capital Workpaper

Is contained in the following 43 pages.

	A	B	C	D	E
1	**PNM Exhibit RNG - 4**				
2	**WP WC - Working Capital Lead Sheet**				
3					
4				**Provides Information To**	**Requires Information From**
5	***Tab Reference***	***Description***	***Purpose***	***Tab name***	***Tab name***
6	E-2-Base,Link,Test	Rule 530 Schedule E-2	Calculates Materials, Supplies, Prepayments, and Deferred Charges by FERC Account and Locations for Base, Linkage, and Test Period.	WP WC-1	WP WC-2, WP WC-3, PNM Exhibit RNG-4 WP OM - O&M.xlsx; WP OM-15, WP OM-16, Manual inputs
7	E-3-Base,Link,Test	Rule 530 Schedule E-3	Calculates Fuel Inventories by Plant for Base, Linkage, and Test Period.	WP WC-1	Manual inputs
8	B-7	Rule 530 Schedule B-7	Calculates Nuclear Fuel Inventory, Activity and Balances for Base, Linkage and Test Period	WP WC-1	Manual inputs
9	WP WC-1	Working Capital Balances for COS Input	Provides a summary of working capital balances for Base and Test Period in the cost of service format.	PNM Exhibit RNG-3 WP COS.xlsx; PNM Exhibit RNG-3 COS Base Adj, PNM Exhibit RNG-3, COS Test	E-2, E-3, B-7
10	WP WC-2	Palo Verde Materials & Supplies and Prepayments	Calculates month to month activity and balances for Palo Verde Materials & Supplies and Prepayments for the Linkage and Test Periods	E-2 Base, Link, Test	E-2, Manual inputs
11	WP WC-3	Navajo ROW Prepayment	Calculates a month to month amortization and renewal of the Navajo ROW Prepayment for the Linkage and Test Periods	E-2 Base, Link, Test	E-2, Manual inputs

	A	B	C	D
1	**Public Service Company of New Mexico**			
2	**Schedule E-2 Notes**			
3	**Materials, Supplies, Prepayments, and Deferred Charges**			
4	Lead Sheet			
5	This schedule is sponsored by PNM Witness Gutierrez			
6	**Note 1:** PNM does not forecast changes to Materials and Supplies or Prepayments, except for ROW balances, Palo Verde, and Transmission Deferral. Therefore, Linkage and Test Period balances agree to the 13-month average calculated for the base period.			
7				
8	**Note 2**: San Juan Generating Station ("SJGS") costs are removed from the base period. This adjustments reflects the abandonment of SJGS as authorized in NMPRC Case No. 19-00018-UT.			
9	Note 3: PNM specifically forecasted Palo Verde working capital balances. Please see PNM Exhibit RNG-4 WP WC-2 for Palo Verde working capital balances for Linkage and Test Periods.			
10				
11	**Note 4:** Navajo ROW treated as lease under FERC and GAAP accounting. Balance of annual payment is comprised of an			
12	annual base payment of $6,000,000 plus a CPI adjustment. The base payment is treated as a lease and recorded to			
13	operating lease assets and the CPI adjustment is recorded to account 165000. In order to reverse the impacts of lease accounting, PNM is adding back the average balance of the prepayment of the base payment. This is consistent with the treatment in NMPRC Case No. 22-00270-UT.			
14	Note 5: ROW balances are forecasted based on current amortization schedules and forecasted renewals. Please refer to PNM Exhibit RNG-4 WP OM-15 and WP OM-16 for ROW balances in the Linkage and Test Period. Also, please refer			
15	to the testimony of PNM Witness Flores-Olivas for discussion of ROW renewals.

2	**Schedule B-7 Notes**		
3	Lead Sheet		
4	This schedule is sponsored by PNM Witness Gutierrez		
5	Note 1: PNM forecasts the amortization of nuclear fuel as nuclear fuel expense, based on AURORA projections. See PNM Exhibit RNG-4 WP Fuel-6 for assumptions on nuclear fuel amortization.		
6			
7	**General Note**: The forecasted activity in nuclear fuel inventory for the Test Period and Linkage data is based on		
8	projections provided by APS (operator of Palo Verde) and reflect PNM's share. Please refer to the testimony of PNM		
9	Witness Wesley Gray for discussion of nuclear fuel activity. Anticipated use of nuclear fuel based on APS operational outage schedules.

3	Lead Sheet					
4						
5	**Note 1**: Variance is driven by expected future increases to the cost of nuclear fuel. Please refer to the testimony of PNM Witness Wesley Gray for discussion on nuclear fuel inventory. Refer to Rule 530 Schedule B-7 for detail activities during the Linkage and Test Period.					
6						
7						
8	Note 2: PNM has reflected transmission ROW balance on a 13-month average as required under the FTY Rule. The increase in projected CPI is the primary reason for the reduction in the balance compared to the adjusted Base Period. See PNM Exhibit RNG-4 WP OM-14.					
9						
10	**Note 3**: For Materials & Supplies, and Prepayments Base Period adjustments, please refer to Rule 530 schedule E-2, columns P, Q, and R. For Production Fuel Stock Base Period adjustments, please refer to Rule 530 schedule E-3, columns O and P. For Nuclear Fuel Base Period adjustments, please refer to Rule 530 schedule B-7, columns Q and R.					
11	**Note 4**: For Materials & Supplies, and Prepayments 13-month average adjustments, please refer to Rule 530 schedule E-2, column AU. For Production Fuel Stock 13-month average adjustments, please refer to Rule 530 schedule E-3, column AR. For Nuclear Fuel Stock 13-month adjustments, please refer to Rule 530 schedule B-7, column AY.

PNM Exhibit RNG-4 Supporting Revenue Requirements Workpapers

WP Fuel- Fuel Workpaper

Is contained in the following 64 pages.

	A	B	C	D	E
1	**PNM Exhibit RNG-4**				
2	**WP Fuel - Lead Sheet**				
3				***Provides Information To***	***Requires Information From***
4	***Tab Reference***	***Description***	***Purpose***	***Tab name***	***Tab name***
5	H2-Base	Rule 530 Schedule H-2 - Cost of Fuel - Base	Fuel cost by type		WP Fuel-4: Fuel Detail- Base
6	H2-Linkage	Rule 530 Schedule H-2 - Cost of Fuel - Linkage	Fuel cost by type	P12: Linkage	WP Fuel-9: Linkage Detail
7	H2-Test	Rule 530 Schedule H-2 - Cost of Fuel - Test	Fuel cost by type	P-12: Test	WP Fuel-6: Test Detail
8	H3-Base	Rule 530 Schedule H-3 -Revenue from FPPCAC - Base	Revenue Generated From PNM Retail Fuel and Purchased Power Clause		WP Fuel-10: H3-Base Detail
9	H3-Linkage	Rule 530 Schedule H-3 -Revenue from FPPCAC - Linkage	Revenue Generated From PNM Retail Fuel and Purchased Power Clause		WP Fuel-11: H3-Linkage Detail, H-3-Base
10	H3-Test	Rule 530 Schedule H-3 -Revenue from FPPCAC - Test	Revenue Generated From PNM Retail Fuel and Purchased Power Clause		WP Fuel-12: H3-Test Detail, WP Fuel 3: Test COS
11	P12-Historical	Rule 530 Schedule P-12 - Fuel statistics information - Base	Provide historical fuel statistics		***Manual Inputs-Books and Records***
12	P12-Linkage	Rule 530 Schedule P-12 - Fuel statistics information - Linkage	Provides forecasted fuel statistics		WP Fuel-9: Linkage Detail, H-2-Linkage
13	P12-Test	Rule 530 Schedule P-12 - Fuel statistics information - Test	Provides forecasted fuel statistics		WP Fuel-6: Test Detail, H-2-Test
14	WP Fuel-1: Base COS	Base period fuel in COS format	Provide a fuel template for input to the cost of service	PNM Exhibit RNG-4 - WP COS, WP Fuel-3: Test COS	WP Fuel-4: Fuel Detail- Base
15	WP Fuel-2: Linkage COS	Linkage fuel data in COS format	Provide a fuel template for input to the cost of service	PNM Exhibit RNG-4 - WP COS	WP Fuel-9: Linkage Detail, WP Fuel-3: Test COS
16	WP Fuel-3: Test COS	Test period fuel in COS format	Provide a fuel template for input to the cost of service	PNM Exhibit RNG-4 - WP COS	WP Fuel-9: Linkage Detail, WP Fuel-1: Test Base
17	WP Fuel-4: Fuel Detail-Base	Fuel cost by Plant, FERC and Cost Type including plant statistics for the Base Period	Provides base fuel cost and statistics for all plants and transactions. Provides all non-fuel related cost to serve by Location, FERC and cost type	H2-Base, P12-Historical, WP Fuel-1: Base COS	***Manual Inputs-Books and Records***
18	WP Fuel-5: Base Period Adj	Schedule of base period adjustments	To provide the fuel related adjustments to normalize the base period	WP Fuel-1-Base COS, WP Fuel-4-Base Detail	***Manual Inputs-Books and Records***
19	WP Fuel-6: Test Detail	Fuel cost by Plant, FERC and Cost Type including plant statistics for the Test	Provides Test fuel cost and statistics for all plants and transactions. Provides all non-fuel related cost to serve by Location, FERC and cost type	WP Fuel-1-Test COS,H-2 Test, E-04 Base and Test	***Manual Inputs-Aurora Output***
20	WP Fuel 7- Did not use				
21	WP Fuel-8- Did not use				
22	WP Fuel-9: Linkage Detail	Fuel cost by Plant, FERC and Cost Type including plant statistics for the Linkage	Provides Linkage fuel cost and statistics for all plants and transactions. Provides all non-fuel related cost to serve by Location, FERC and cost type	H2-Linkage, WP	***Manual Inputs-Aurora Output***
23	WP Fuel-10: H3-Base Detail	Fuel clause detail for base period	Provides the detail from the monthly fuel clause filings	H3-Base, WP Fuel-1: Base COS	***Manual Inputs-Books and Records***
24	WP Fuel-11: H3-Linkage Detail	Linkage Fuel clause detail data	Provides a summary of linkage data to show the status of the balancing account	H3-Linkage	WP Fuel-9: Linkage Detail, WP Fuel-3: Test COS
25	WP Fuel-12: H3-Test Detail	Fuel Clause detail for test period	Provides the supporting data for H3-Test	H3-Test	WP Fuel-6: Test detail, WP Fuel-3: Test COS
26	WP Fuel-13 -2027-2028 Monthly	2027-2028 Monthly Fuel Detail	Provides monthly fuel data from January 2027-December 2028		
27	WP Fuel-14: Linkage EDAM	Breakout of EDAM Revenues	Provides a calculation of the new EDAM expected revenues.	WP Fuel-2: Linkage COS, WP Fuel-9: Linkage Detail	***Manual Inputs-Aurora Output***
28	WP Fuel-15: Test EDAM	Breakout of EDAM Revenues	Provides a calculation of the new EDAM expected revenues.	WP Fuel-3: Test COS, WP Fuel-6: Test Detail	***Manual Inputs-Aurora Output***

13	WP OM-5	Retiree pension and medical expenses for the base period	Provides retiree pension and medical expenses for the Base Period and the Adjusted Base Period	WP OM-3 WP OM-4	Manual Inputs Towers Watson report.
14	WP OM-6	Active medical and dental expenses for the base period.	Provides active employee medical and dental expenses for the Base and Adjusted Base Period.	WP OM-3, OM-4, WP OM-10	Manual Inputs
15	WP OM-7	Power Plants normalized outages.	Provides adjustments, by FERC and element of costs, for planned outages at generating plants for the base and adjusted base period.	WP OM-3	Manual Inputs
16	WP OM-8	WAPA Third Party Transmission Exchange calculation	Provides O&M adjustment for WAPA third party transmission exchange.	WP OM-3	WP AL Allocators Workpaper.xlsx; WP AL-4
17	WP OM-10	Linkage Period	Provides the details of the linkage period for O&M.	H1 Base and Test	WP OM-2, WP OM-4, WP OM-5 OM-6, OM-13, OM-14, OM-15, OM-16, WP-SS-shared Services.xlsx WP SS-12, SS-13, WP LA - Labor Workpaper.xlsx WP LA-1
18	WP OM-11	Palo Verde Lease Adjustments	Provides the summary of the Palo Verde Lease expense schedule. Includes Unit 1 leases (104MW) at half price beginning 1/15/2015 and the 10 MW Unit 2 lease at half price beginning 1/1/16.	WP OM-3, WP OM-4	Manual Inputs
19	WP OM-12	Dues, Fees, Fines	Provides the breakout of Dues, Fees, Fines, and Membership Fees.	WP OM-3	Manual Inputs
20	WP OM-13	PV Lease Amortizations	Provides the summary of the Palo Verde Lease Amortizations for Units 1 and 2.	WP ORB Workpaper; WP ORB-1	Manual Inputs
21	WP OM-14	Navajo ROW Renewal	Provides the details of the renewal of the Navajo ROW for the base, linkage and test periods.	WP OM-3, OM-4	Manual Inputs
22	WP OM-15	ROW Distribution	Detailed amortization of Distribution Right-of-Way. Includes current and future renewals.	WP OM-4, WP ORB Workpaper WP ORB-1	Manual Inputs
23	WP OM-16	ROW Transmission	Detailed amortization of Transmission Right-of-Way. Includes current and future renewals.	WP OM-4, WP ORB Workpaper WP ORB-1	Manual Inputs
24	WP OM-17	Transmission By Others	Annualization of the 2026 expense to capture updated rates from contract renewals occurring at the beginning of the calendar year.	WP OM-3	Manual Inputs

3	Lead Sheet	
4		
5	**Note**	**Description**
6	Note 1:	Removed amounts expensed in the Base Period associated with the Solar Direct program.
7	Note 2:	Removed amounts expensed in the Base Period that are collected under the Energy Efficiency Rider.
8	Note 3:	Removed amounts expensed in the Base Period that are collected under the Transportation Electrification Rider.
9	Note 4:	Remove non-allowable Litigation/Non-Litigation expense from the Base Period. Please refer to the testimony of PNM Witness Gutierrez for further discussion.
10	Note 5:	PNM annualized the 2026 expense to capture updated rates from contract renewals occurring at the beginning of the calendar year.
11	Note 6:	Reclass of O&M expenses related to High Lonesome Mesa and Western Spirit based on the approved OATTs.
12	Note 7:	Remove membership dues expense from the Base Period.
13	Note 8:	Remove miscellaneous write-offs that were recorded during the Base Period. PNM does not anticipate the write-off expenses to recur in the future.
14	Note 9:	PNM is removing all amounts expensed in the Base Period for Grid Modernization.

7		
8	**Notes**	**Description**
9	Note 1:	PNM forecasted O&M expenses related to the FERC Incremental rates based on the amounts approved in the OATTs.
10	Note 2:	PNM is specifically forecasting O&M expenses related to the insurance premiums for excess liability insurance policies for the Test Period. Please refer to testimony of PNM witness Agrawal.
11	Note 3:	PNM removed the actual A&G capital loads recorded to the Company's books and records in the Base Period and included the capital loads for the Test Period, based on the capital construction spend during the Test Period. These amounts are based on system calculations and are not being provided as fully-functional due to the complexity of the calculation. Please see the testimony of PNM witness Gray, Flores-Olivas, Phelps for discussion of capital spent during the Test Period. Also, please see PNM Exhibit RNG-14 for further detail on capital loads.
12	Note 4:	PNM is specifically forecasting O&M expenses related to the Grid Modernization filing for the Test Period.
13	Note 5:	PNM is specifically forecasting Incremental O&M for specific program needs including asset hardening, low income rate class, electrical grid expansion, renewable energy investment and wildfire mitigation. Please see the testimonies of PNM witnesses Gray, Flores-Olivas, Phelps for details of the specific programs.

5		
6	**Notes**	
7	General Note 1:	The electronic version of this worksheet uses the Microsoft excel outline function. This function groups the elements of cost, and or columns for print formatting purposes.
8	General Note 2:	Please refer to testimony of PNM Witness Gray for discussion of planned outage normalization.
9	General Note 3:	PNM escalated historical planned outage expense at 1.5% per year to be consistent with prior period escalation factors.
10	Note 4:	PNM is not normalizing outages for the leased Capacity of PV Unit 1 and 2 as it no longer has the lease.

3	Lead Sheet	
4	**Base Period data is historical information from the Company's Books and Records.**	
5		
6	**Notes**	
7	Note 1:	Revenue billing units are 91 MW for April - September, and 107 MW for October - March.
8	Note 2:	OATT Rate based on current tariff rate at FERC.
9	Note 3:	Contract's diversity credit reflects 15% reduction to the OATT rate (line 30)
10	Note 4:	Service credit is included in Section 8 of contract P0695. This credit is based on WAPA's posted Desert Southwest Region Consolidated "Intertie Project" monthly firm point-to-point transmission service rate * 46.7% (50MW / 107MW).

75	Total Test Period Expense			9,742,443	**WP OM-4, Col T**
76					
77	**Note 1**: Per the Navajo agreement, annual April payments are escalated using the CPI. PNM assumed the 3% escalation applied to non-labor for 2027 & 2028 applied to the future payments.				
78	**Note 2**: Per agreement, PNM owes $120M over a period of 240 months, or 20 years, plus escalation. Due to the timing of cash payments, $5,388,000 was not paid at the inception of the contract, but rather at a later point in time. Per ASC 840, lease accounting standards, the amounts of $114,612,000 and $5,388,000 are amortized on a straight-line basis over their respective time periods.

6	WP-LA-1	Summary of PNM Direct Labor	Summary of PNM Labor, Base Period, Adjusted Base Period, Linkage data and Test Period amounts. Also provides the jurisdictional allocation of PNM Labor for the Wages and Salary Allocator calculation.	WP OM - O&M Workpaper.xlsx; WP OM-3, WP OM-4 WP AL - Allocators Workpaper.xlsx; WP AL-7, WP AL-8	WP-LA-2, WP-LA-3 PNM Exhibit RNG-3 - WP COS.xlsx; PNM Exhibit RNG-3 COS BASE, PNM Exhibit RNG-3
7	WP-LA-2	PNM Normalized Labor (Non San Juan)	Calculates normalization of PNM labor, excluding SJGS and overtime, for Base Period, and development of Linkage data and Test Period labor expenses with escalation.	WP-LA-1	Manual Inputs
8	WP-LA-3	PNM Overtime	Calculates PNM, excluding SJGS, overtime expenses for Linkage data and Test period, using labor escalation rates.	WP-LA-1	Manual Inputs
9	WP-LA-4	Summary of Shared Services Labor	Summary of PNMR Services Company Labor, Base Period, Adjusted Base Period, Linkage data and Test Period amounts.	WP SS-Shared Services.xlsx; WP SS-2, WP SS-3, WP SS-8, WP SS-13, WP SS-14	WP-LA-5, WP-LA-6
10	WP-LA-5	PNMR Services Normalized Labor	Calculates normalization of PNMR Services Company labor, excluding overtime, for Base Period, and development of Linkage data and Test Period labor expenses with escalation, and associated payroll taxes (unallocated share).	WP-LA-4 WP SS-Shared Services.xlsx; WP SS-8, WP SS-13, WP SS-14	Manual Inputs
11	WP-LA-6	PNMR Services Overtime	Calculates PNMR Services Company overtime expenses for Linkage data and Test Period, using labor escalation rates, and associated payroll taxes (unallocated share).	WP-LA-4 WP SS-Shared Services.xlsx; WP SS-8, WP SS-13, WP SS-14	Manual Inputs

29					
30	Note 1: PNM did not annualize cost types 140, 914, and 915, as these specifically forecasted costs in the linkage and test period.				
31	Note 2: PNM escalates labor in April for non-union employees at an escalation rate 4.0% for 2027, and 2028. For union employees, PNM escalates labor in May at an escalation rate of 5.0% for 2027, and 2028. Please see the testimony of PNM Witness Pino.				
32	Note 3: Please refer to the testimony of PNM Witnesses Gray, Flores-Olivas and Phelps for discussion of additional headcount additions added during the linkage data and Test Period.				
33	General Note: The electronic version of this worksheet uses the Microsoft Excel outline function. This function groups the elements of cost, and or columns for print formatting purposes.

3				***Provides Information To***	***Requires Information From***
4	***Tab Reference***	***Description***	***Purpose***	***Tab Name***	***Tab Name***
5	WP SS-1 Summary	Summary of Shared Services	Summarizes the Shared Services for Base and Test Periods		WP SS-2, WP SS-3
6	WP SS-2 Base Period Adj Summary	Shared Services Base Period adjustments	Provides the Shared Services adjustments to the Base Period	WP SS-1, WP SS-3, WP SS-4, WP OM - OM Workpaper.xlsx; WP OM-4	WP SS-8, WP SS-9, WP SS-10, WP SS-12, WP LA-Labor Workpaper.xlsx; WP LA-4, WP OM-OM Workpaper.xlxs; WP OM-6
7	WP SS-3 Summary Non-Escalating	Summary of Non-Escalating Shared Services items	Identifies costs that are specifically forecasted for the Test Period and also provides for escalation from adjusted Base Period to Test Period	WP SS-1, WP SS-4 , WP OM - OM Workpaper.xlsx; WP OM-4	WP SS-2, WP SS-10, WP LA-Labor Workpaper.xlsx; WP LA-8, WP OM-OM Workpaper.xlsx; WP OM-6
8	WP SS-4 Base Period Adj Summary	Summary of Base Period Adjustments	Provides a summary of Base Period Shared Services adjustments functionalized for cost of service	WP Plant - Net Plant Workpaper.xlsx; WP Plant 1b, WP GT - General Taxes Workpaper.xlsx; WP GT-2, WP GT-4, WP OM - OM Workpaper.xlsx; WP OM-2, OM-3, WP RC - Revenue Credits Workpaper.xlxs; RC-1	WP SS-2, WP SS-7, WP SS-8, WP SS-9, WP OM - OM Workpaper.xlxs; WP OM-2
9	WP SS-5 Base Allocation Rates	Base Period Allocation Rates	Provides the Shared Services allocation rates to be used for the Base Period	WP SS-2, WP SS-7, WP SS-8, WP SS-9, WP SS-13	Manual Inputs
10	WP SS-6- Test Allocation Rates	Test Period Allocation Rates	Provides the allocation rates for Shared Services to be used for the Test Period	WP SS-3, WP SS-8, WP SS-12, WP SS-13	Manual Inputs
11	WP SS-7 Revenue	Base Period Revenue allocation	Provides the allocation of revenue for the Base Period by location	WP SS-2, WP SS-4, WP RC - Revenue Credits Workpaper.xlsx; WP RC-1	WP SS-5
12	WP SS-8 Payroll Tax	Payroll Taxes allocation	Provides the allocation of payroll taxes for the base, Linkage and Test Periods by location	WP SS-2, WP SS-4, WP GT-General Taxes.xlsx; GT-4	WP SS-5, WP SS-6, WP SS-10 pg 2, SS-10 pg 3, WP LA-Labor Workpaper.xlsx; WP LA-5, WP LA-6
13	WP SS-9 Property Tax	Base Period Property Taxes allocation	Provides the allocation of property taxes for the Base Period by location	WP SS-2, WP SS-4 WP, GT-General Taxes.xlsx; GT-2	WP SS-5
14	WP SS-10 Incentive Comp pg 1&2	Incentive Compensation pg. 1 & 2	Provides a summary of incentive compensation for the base, Linkage and Test Periods	WP SS-2, WP SS-3, WP SS-10 pg 3, SS-10 pg 4, WP SS-12, WP SS-13	WP SS-10 pg 3, SS-10 pg 4
15	WP SS-10 Incentive Comp pg 3	Incentive Compensation pg. 3	Provides the calculations for incentive compensation for the Linkage and Test Periods.	WP SS-10	WP SS-10 pg 1&2, WP LA-Labor Workpaper.xlsx; WP LA-5, Manual Inputs
16	WP SS-11 Dues	Dues, Fees, and Fines	Provides a summary of the categorization of the element of cost: dues, fees and fines.	WP SS-2	Manual Inputs
17	WP SS-12 Linkage 1	Linkage Data for Shared Services: 07-01-2026 through 06-30-2027	Provides a summary of Shared Services by location, including the allocation to PNM, for the Linkage period 1	WP OM-O&M Workpaper.xlsx; WP OM-10	WP SS-3, WP SS-10, WP LA-Labor Workpaper.xlsx; WP LA-4, WP OM - OM Workpaper.xlsx; WP OM-6
18	WP SS-13 Linkage 2	Linkage Data for Shared Services: 10-01-26 through 09-30-2027	Provides a summary of Shared Services by location, including the allocation to PNM, for the Linkage period 2	WP OM-O&M Workpaper.xlsx; WP OM-10	WP SS-3, WP SS-6, WP SS-10, WP LA-Labor Workpaper.xlsx; WP LA-4, WP OM - OM Workpaper.xlsx; WP OM-6
19	WP SS-14 Advertising	Advertising	Provides a summary of the shared services adjustment for non-allowable advertising	WP SS-2	Manual Inputs
20	Note: File name is provided if worksheet is linked to external workbook.

5	
6	General Note: The electronic version of this worksheet uses the Microsoft excel outline function. This function groups the elements of cost, and or columns for print formatting purposes.
7	Note 1: PNM reclasses certain legal expenses to the correct location to reflect correct accounting of said expenses.
8	Note 2: PNM reclasses these Shared Services cost categories to ensure that they are allocated appropriately in the Cost of Service model.
9	Note 3: PNM is not seek recovery of other income and deduction activity.
10	Note 4: Location 999 activities are held at PNMR Shared Services and are not allocated to PNM. Adjustment reflects elimination of the billings from PNMR Shared Services to its subsidiaries.
11	Note 5: PNM is not seeking recovery of non-recurring expenses. Non-recurring expenses are tracked in the Company's books and records by a unique home center.
12	Note 6: PNM has ensured that all costs associated with the proposed acquisition with Blackstone have been removed from expenses in the cost of service.
13	Note 7: PNM is not seeking recovery of certain legal expenses. Please refer to the testimony of PNM Witness Gutierrez.
14	Note 8: PNM is not seeking recovery of certain advertising expenses.

PNM Exhibit RNG-4 Supporting Revenue Requirements Workpapers

WP GT- General Taxes Workpaper

Is contained in the following 34 pages.

	A	B	C	D	E
1	**PNM Exhibit RNG-4**				
2	**WP GT - Lead Sheet**				
3				***Provides Information To***	***Requires Information From***
4	***Tab Reference***	***Description***	***Purpose***	***Tab name***	***Tab name***
5	WP GT-1	Summary of General Taxes in Cost of Service Format	Provides a consolidated input sheet formatted to cost of service line items. Provides an easy link to PNM Exhibit RNG-3.	PNM Exhibit RNG-3 - WP COS.xlsx; COS Base Adj, COS Test	WP GT-2, WP GT-4, WP GT-6
6	WP GT-2	Property Taxes Allocation and Test Period Calculation	Provides an allocation of Base Period books and records property taxes allocated to cost of service line items, as well as the calculation of Test Period property taxes.	WP GT-1	WP Plant Net Plant Workpaper.xlsx; WP Plant -1, WP Corporate Net Plant Workpaper.xlsx; WP Plant 8 & WP Plant 9, WP SS-Shared Services.xlsx; WP SS-4, Manual Inputs
7	WP GT-3	Property Tax Rates	Calculates the weighted property tax rates for cost of service plant line items, based on historic rates.	WP GT-2	WP Plant Net Plant Workbook.xlsx: WP Plant - 1, Manual Inputs
8	WP GT-4	Payroll Taxes	Provides Payroll taxes functionalized to production, distribution, and transmission for Base period and Test Period.	WP GT-1	GT - 5 PNM Payroll Tax WP SS-Shared Services.xlsx; SS-8 Payroll Tax
9	WP GT-5	PNM Payroll Tax	Provides Payroll taxes functionalized to production, distribution, and transmission for Base Period and Test Period.	WP GT-4	WP LA - Labor Workpaper.xlsx; WP LA - 1, Manual Inputs
10	WP GT-6	Other Misc. Taxes	Provides the support for Base Period Misc Taxes and calculation of Test Period misc. property taxes.	WP GT-1	Manual Inputs
11					
12	**Note: File name is provided, if worksheet is linked to external workbook.**

5							
6	Note 1: Changes in property taxes are a result of changes in projected taxable valuation based on forecasted activity to plant in service. See PNM Exhibit RNG-4 WP Plant. In addition, changes are based on projected escalation to property tax rates. See PNM Exhibit RNG-4 WP GT - 3.						
7	**Note 2**: Changes in Payroll taxes are a result of projected labor escalations and changes to headcounts. Please see WP LA - Labor Workpapers for detailed calculations and assumptions for Test Period labor costs.						
8	**Note 3**: Reference - Please refer to WP GT - 2 for base period adjustments for property taxes. Please refer to WP GT - 4 for base period adjustments for payroll taxes. Please refer to WP GT - 6 for base period adjustments for other taxes.

5							
6	**General Note:** PNM has allocated Base Period property taxes to cost of service categories based on 2025 Year-end Net Plant values and weighted property tax rates from WP GT-3 to allocate the actual property taxes in the Base Period to the cost of service line items.						
7	**Note 1**: New Mexico taxable property values are estimated by applying a ratio of 33 and 1/3 percent per Section 7-37-3 NMSA 1978 to the net book value of the property.						
8	**Note 2**: Palo Verde effective tax rate is determined by the Base Period property tax expense divided by the Base Period net book value.						
9	**Note 3**: Shared Services assets are derived by using the Corporate Net Book Value from WP Plant - Corporate Net Plant Workbook.xlsx and applying the Test Period CAM rates to obtain PNM's allocated share.

6	**Note 1**: Source of Rates from Certificates of Property Taxes By NM County are available at NM Department of Finance and Administration website: http://nmdfa.state.nm.us/Certificate_of_Property_Tax.aspx						
7	**Note 2**: New Mexico Composite Tax Rate Calculation includes PNM's allocated Shared Services property located in New Mexico.						
8	**Note 3**: Arizona property tax rates were held constant for the linkage and Test Period. PNM does not expect significant escalation on Arizona property tax rates.						
9	**Note 4**: The estimated NM property tax rate for 2026, 2027 , and 2028 was based on the prior year rate multiplied by the escalation factor in column I, row 34.

4							
5	Base Period data is historical information from the Company's Books and Records.						
6	**Note 1**: Revenue taxes are removed from the Base Period as the revenue taxes are based on the revenue requirement in PNM Exhibit RNG-3.						
7	**Note 2**: PNM Removed the impacts of Gross Receipts, Franchise Taxes and Excise Taxes, as these are collected outside of base rates.						
8	**Note 3**: PNM removed the impacts of a compensating tax during the Base Period.						
9	**Note 4**: Escalations are based on the annual rates in cells B26 and C26.						
10	**Note 5**: Native American Taxes includes transactions related to possessory interest tax which does not change therefore these amounts are held flat from the base period						
11	**General Notes**:						
12	The electronic version of this worksheet uses the Microsoft excel outline function. This function groups the elements of cost, and or columns for print formatting purposes.

3	**Notes Page for WP OA-1**
4	
5	OA-Lead Sheet
6	
7	**WP OA-1 Notes**
8	Note 1: Customer deposits –The test period balances match the adjusted base period balances as PNM does not forecast any significant changes to these balances
9	
10	Note 2: Refer to ORB-11 for schedule of unamortized loss on reaquired debt amortizations.
11	Note 3: Please refer to WP ORB-5 for adjustments made to accretion expense. PNM is adjusting ARO Accretion directly in order to reduce the ARO accretion to equal funding of Nuclear Decommissioning Trust of $1.3 million for Unit 3. Additionally, San Juan Generating Station ("SJGS") costs are removed from the base period. This adjustments reflects the abandonment of SJGS as authorized in NMPRC Case No. 19-00018-UT.
12	Note 4: Approved amortization of 20 years in Case No. 16-00276-UT
13	Note 5: Amortization of rate case expenses associated with the application and litigation of this proceeding.
14	Note 6: Reflects the start to amortization of the regulatory assets and liabilities that were not present in the Base Period. These items were either authorized for recovery in NMPRC Case No. 24-00089-UT or other NMPRC proceeding or PNM is requesting new amortization in this proceeding. Please refer to the testimony of PNM Witness Gutierrez for discussion of the requests related to regulatory assets and liabilities in this proceeding.
15	General Note: The electronic version of this worksheet uses the Microsoft Excel outline function. This function groups the elements of cost, and or print formatting purposes.

PNM Exhibit RNG-4 Supporting Revenue Requirements Workpapers

WP RC- Revenue Credits Workpaper

Is contained in the following 12 pages.

	A	B	C	D	E
1	**PNM Exhibit RNG-4**				
2	**WP RC - Lead Sheet**				
3					
4				***Provides Information To***	***Requires Information From***
5	***Tab Reference***	***Description***	***Purpose***	***Tab name***	***Tab name***
6	WP RC-1	Summary of Revenue Credits	Provides a summary of revenue credits, from Base Period, Linkage and Test Period.	PNM Exhibit RNG-3 WP COS.xlsx; COS Base Adj, COS Test	WP RC-2, WP RC-3, WP RC-4, WP SS - Shared Services Workpaper.xlsx; WP SS-7, Manual Inputs
7	WP RC-2	Other Retail Revenue	Provides the detail of Other Retail Revenue, classifying it as to whether it is included in revenue credits or excluded.	WP RC-1	Manual Inputs
8	WP RC-3	Transmission Revenue Credits	Provides the detail of Transmission Revenues in the base period and identification of revenue credits.	WP RC-1	Manual Inputs
9	WP RC-4	Other Electric Rev Gas Plant	Provides the details of Gas AMA forecast for Linkage and Test Period	WP RC-1	Manual Inputs
10	WP RC-5	Summary of Misc Service Charges	Provides a summary of miscellaneous service charges from Base Period, Linkage and Test Period.	WP RC-2	Manual Inputs
11	WP RC-6	Securitization Servicing & Administration Fees	Provides the calculation for test period securitization servicing and administration fees.	WP RC-3	Manual Inputs

110	Real Power Loss Rate Test Period (note 1)	2.78%				
111	Note 1: Real time power loss rate is posted in PNM's OATT					
112	Note 2: During PNM's final review, it was identified that retail native load had not been updated to reflect growth during the base period. Updating this would result in a net increase to the Base Rate Revenue Requirement of $4.3 million. PNM elected not to update due to the significance of the re-work and and because not updating this results in a customer benefit.

2026 and 2027 Cost Allocation Manual - Allocators

Is contained in the following 33 pages.

2026 Cost Allocation Manual - Allocators

Company 7 – PNMR Services Allocations

Direct Charge Allocations:

There are various employees of PNMR Services Company who work on projects that benefit only one operating unit. To provide the ability to direct charge time spent on such projects, the company has devised allocators that move 100% of charges recorded with these allocators directly to the operating unit benefiting from their work. All are part of the PNMR Services Allocation. The following Locations provide for 100% allocation:

Location	Allocates to Company	
917	9	PNMR DM
942	1	PNM Electric Services
946	3	PNM Bulk Power Marketing
947	2	PNM Electric Transmission Services
953	12	TNMP – Texas
999	8	TXNM Energy

Allocation Code 999 – TXNM Energy

Location 999 is part of the PNMR Services Allocation. 100% of costs charged to this location are allocated to Company 8 – TXNM Energy, Inc. This method of allocation provides a direct charge from PNMR Services Company to TXNM Energy while still capturing the appropriate corporate home center that incurred those costs. It is used primarily for items that should be recorded at the Holding Company level.

Allocation Code 911 – Financial Systems

Allocation Code 911 – Financial Systems is a part of the PNMR Services Allocation where expenses incurred for shared services are equitably allocated to the operating units.

The transaction rate based on volume produced will be used for the distribution of costs to business units. The allocation rate is based on the number of financial transactions. The total is composed of all the general ledger transactions and is allocated proportionally based on the number of financial transactions recorded in the general ledger by each company.

The Financial Systems allocator is primarily used for expenses incurred in finance support groups as well as maintenance of the general ledger systems.

	PNM ELEC	PNM BULK	PNM TRANS	TNMP	PNMR DM	
	001	003	002	012	009	TOTAL
Number of Transactions	1,033,770	56,844	104,362	634,101	0	**1,829,077**
San Juan Transactions	0	8,322	0	0	0	**8,322**
Total GL Transactions	1,033,770	65,166	104,362	634,101	0	**1,837,399**
Co. 006 Allocated	6,539	0	2,327	0	0	**8,866**
Co. 007 Allocated	24,169	7,949	7,194	16,844	0	**56,157**
Total Allocated	30,708	7,949	9,522	16,844	0	**65,023**
Total Transactions*	**1,064,478**	**73,115**	**113,884**	**650,945**	**0**	**1,902,422**
Percent to be applied**	**55.95%**	**3.84%**	**5.99%**	**34.22%**	**0.00%**	**100.00%**

* = 1,033,770 + 30,708 = 1,064,478

** = 1,064,478 / 1,902,422 = 55.95%

Allocation Code 912 - Accounts Payable

Allocation Code 912 – Accounts Payable is a part of the PNMR Services Allocation where expenses incurred for shared services are equitably allocated to the operating units.

The transaction rate based on volume produced will be used for the distribution of costs to business units. The allocation rate is based on the number of invoices. The total is composed of the general ledger transactions related to accounts payable and is allocated proportionally based on the number of invoices processed for each company.

The Accounts Payable allocator is primarily used for expenses incurred in processing vendor payments.

Allocation Code 914 - Asset Management

Allocation Code 914 – Asset Management is a part of the PNMR Services Allocation where expenses incurred for shared services are equitably allocated to the operating units.

The transaction rate based on volume produced will be used for the distribution of costs to business units. The allocation rate is based on the total of depreciable assets and is allocated proportionately based on the number of depreciable assets on record for each company.

The Asset Management allocator is primarily used for general functions related to the management of assets including depreciation, asset retirement, clearing completed construction projects to plant and for general maintenance of the fixed asset software system.

Allocation Code 968 - IT Infrastructure

Allocation Code 968 – IT Infrastructure is a part of the PNMR Services Allocation where expenses incurred for shared services are equitably allocated to the operating units.

The transaction rate based on volume will be used for the distribution of costs to business units. The allocation rate is based on the total number of Network ID's and is allocated proportionately based on number of employee Network ID's belonging to each company.

The IT Infrastructure allocator is used for expenses incurred in maintaining information technology that cannot be traced to an individual operating unit used by the Company.

Allocation Code 972 – Masthead Building

Allocation Code 972 – Building-Masthead is a part of the PNMR Services Allocation where expenses incurred for shared services are equitably allocated to the operating units.

Transactional allocation based on square footage will be used for the distribution of costs to business units. The allocation rate is based on the total square footage and occupancy of Masthead Building and is allocated proportionately based on building square footage and department's occupancy per company.

The Masthead Building allocator is used to allocate expenses among the operating units supported by shared services occupying space at Masthead.

Allocation Code 974 – TNMP-Intercompany Leases

Allocation Code 974 – TNMP-Intercompany Building Leases is a part of the PNMR Services Allocation where the occupancy of TNMP buildings by shared service employees is based on the market rate for the square footage used by shared service employees and is equitably allocated to the operating units.

Transactional allocation based on square footage used by employees multiplied by the market rate will be used for the distribution of costs to business units. The allocation rate is based on the square footage for shared service employees, in the TNMP buildings multiplied by the market rate and is allocated proportionately to the operating units based on the shared service employees and departments which occupy the TNMP Facilities.

The TNMP-Intercompany Leases allocator is used to allocate lease expenses among the operating units based on the departments occupying space in TNMP Facilities.

Allocation Code 986 – Maximo (TXNM)

Allocation Code 986 – Maximo is a part of the PNMR Services Allocation where expenses incurred for shared services are equitably allocated to the operating units.

Transactional allocation is based on the Maximo transaction count. The total is composed of all Maximo transactions posted to the financials and is allocated proportionately based on the number of transactions posted by each company.

The Maximo allocator reflects products and services designed to impact or benefit all PNMR. This basis of assignment is described for each Area in Exhibit IV. Maximo transaction count is primarily used to allocate costs associated with managing the Maximo work management system.

Company 6 – PNM General Utility Allocations

Direct Charge Allocations:

There are various employees of the general PNM Utility who work on projects for TNMP Texas. Such services are described in the Services Agreement between PNM and TNMP filed as a Class I transaction on October 9, 2006. To provide the ability to direct charge time spent on such activities, the company has devised allocators that move 100% of charges recorded with these allocators directly to the operating unit benefiting from their work.

The following Locations provide for 100% allocation:

- Location 192 – TNMP-Texas

Allocation Code 192 – TNMP-Texas

Location 192 is a part of the Services Agreement Allocation between PNM and TNMP. 100% of the costs charged to this location are allocated from PNM to TNMP Texas. This method of allocation allows us to provide a direct charge from the corporate level to TNMP Texas while still capturing the appropriate corporate home center that incurred those costs.

Allocation Code 174 - Massachusetts Method (Companies 1, 2)

Allocation Code 174 – Massachusetts Method (Companies 1, 2) is a part of the PNM Common Utility Allocation where expenses incurred by the general PNM Utility (Company 6) are equitably allocated to the operating units (Company 1 – PNM Electric, Company 2 – PNM Transmission)

Allocation rates are based on the Massachusetts Method. This method incorporates employee head count, gross margin (revenues less operating expenses), and net utility plant (plant in service less depreciation) amounts and calculates a composite average of all three.

The costs allocated to PNM Electric Distribution and Transmission, based on the Massachusetts Method, are related to engineering and technology support provided for safe transmission and distribution operations.

2027 Cost Allocation Manual - Allocators

Company 7 – PNMR Services Allocations

Direct Charge Allocations:

There are various employees of PNMR Services Company who work on projects that benefit only one operating unit. To provide the ability to direct charge time spent on such projects, the company has devised allocators that move 100% of charges recorded with these allocators directly to the operating unit benefiting from their work. All are part of the PNMR Services Allocation. The following Locations provide for 100% allocation:

Location	Allocates to Company	
917	9	PNMR DM
942	1	PNM Electric Services
946	3	PNM Bulk Power Marketing
947	2	PNM Electric Transmission Services
953	12	TNMP – Texas
999	8	TXNM Energy

Allocation Code 999 – TXNM Energy

Location 999 is part of the PNMR Services Allocation. 100% of costs charged to this location are allocated to Company 8 – TXNM Energy, Inc. This method of allocation provides a direct charge from PNMR Services Company to TXNM Energy while still capturing the appropriate corporate home center that incurred those costs. It is used primarily for items that should be recorded at the Holding Company level.

Allocation Code 911 – Financial Systems

Allocation Code 911 – Financial Systems is a part of the PNMR Services Allocation where expenses incurred for shared services are equitably allocated to the operating units.

The transaction rate based on volume produced will be used for the distribution of costs to business units. The allocation rate is based on the number of financial transactions. The total is composed of all the general ledger transactions and is allocated proportionally based on the number of financial transactions recorded in the general ledger by each company.

The Financial Systems allocator is primarily used for expenses incurred in finance support groups as well as maintenance of the general ledger systems.

Allocation Code 912 - Accounts Payable

Allocation Code 912 – Accounts Payable is a part of the PNMR Services Allocation where expenses incurred for shared services are equitably allocated to the operating units.

The transaction rate based on volume produced will be used for the distribution of costs to business units. The allocation rate is based on the number of invoices. The total is composed of the general ledger transactions related to accounts payable and is allocated proportionally based on the number of invoices processed for each company.

The Accounts Payable allocator is primarily used for expenses incurred in processing vendor payments.

Allocation Code 914 - Asset Management

Allocation Code 914 – Asset Management is a part of the PNMR Services Allocation where expenses incurred for shared services are equitably allocated to the operating units.

The transaction rate based on volume produced will be used for the distribution of costs to business units. The allocation rate is based on the total of depreciable assets and is allocated proportionately based on the number of depreciable assets on record for each company.

The Asset Management allocator is primarily used for general functions related to the management of assets including depreciation, asset retirement, clearing completed construction projects to plant and for general maintenance of the fixed asset software system.

Allocation Code 968 - IT Infrastructure

Allocation Code 968 – IT Infrastructure is a part of the PNMR Services Allocation where expenses incurred for shared services are equitably allocated to the operating units.

The transaction rate based on volume will be used for the distribution of costs to business units. The allocation rate is based on the total number of Network ID's and is allocated proportionately based on number of employee Network ID's belonging to each company.

The IT Infrastructure allocator is used for expenses incurred in maintaining information technology that cannot be traced to an individual operating unit used by the Company.

Allocation Code 971 – Farmington Building

Allocation Code 971 – A new office building was purchased and refurbished during 2026. This new office building will house PNM employees and Shared Service Employees. Since this building includes Shared Service employees it is necessary to allocate costs between PNM and TNMP.

Transactional allocation based on anticipated occupancy for the building since the building has not completed construction at this point. The allocation rate is based on the occupancy for PNM and shared service employees in the Farmington building and is allocated proportionately to the operating units based on the employees and departments which occupy the Farmington facility.

Allocation Code 972 – Masthead Building

Allocation Code 972 – Building-Masthead is a part of the PNMR Services Allocation where expenses incurred for shared services are equitably allocated to the operating units.

Transactional allocation based on square footage will be used for the distribution of costs to business units. The allocation rate is based on the total square footage and occupancy of Masthead Building and is allocated proportionately based on building square footage and department's occupancy per company.

The Masthead Building allocator is used to allocate expenses among the operating units supported by shared services occupying space at Masthead.

Allocation Code 974 – TNMP-Intercompany Leases

Allocation Code 974 – TNMP-Intercompany Building Leases is a part of the PNMR Services Allocation where the occupancy of TNMP buildings by shared service employees is based on the market rate for the square footage used by shared service employees and is equitably allocated to the operating units.

Transactional allocation based on square footage used by employees multiplied by the market rate will be used for the distribution of costs to business units. The allocation rate is based on the square footage for shared service employees, in the TNMP buildings multiplied by the market rate and is allocated proportionately to the operating units based on the shared service employees and departments which occupy the TNMP Facilities.

The TNMP-Intercompany Leases allocator is used to allocate lease expenses among the operating units based on the departments occupying space in TNMP Facilities.

Allocation Code 977 – Downtown Albuquerque Buildings

Allocation Code 977 – Downtown Albuquerque Buildings is a part of the PNMR Services Allocation where expenses incurred for shared services are equitably allocated to the operating units.

Transactional allocation based on square footage will be used for the distribution of costs to business units. The allocation rate is based on the total square footage and occupancy of Downtown Albuquerque Buildings and is allocated proportionately based on building square footage and department's occupancy per company.

The Downtown Albuquerque Buildings allocator is primarily used to allocate costs associated with the maintenance of these facilities.

Allocation Code 986 – Maximo (TXNM)

Allocation Code 986 – Maximo is a part of the PNMR Services Allocation where expenses incurred for shared services are equitably allocated to the operating units.

Transactional allocation is based on the Maximo transaction count. The total is composed of all Maximo transactions posted to the financials and is allocated proportionately based on the number of transactions posted by each company.

The Maximo allocator reflects products and services designed to impact or benefit all PNMR. This basis of assignment is described for each Area in Exhibit IV. Maximo transaction count is primarily used to allocate costs associated with managing the Maximo work management system.

Allocation Code 993 - Employee Headcount (TXNM)

Allocation Code 993 – Employee Headcount is a part of the PNMR Services Allocation where expenses incurred for shared services are equitably allocated to the operating units.

Transactional allocation based on the employee headcount. The total is composed of all TXNM employees and is allocated proportionately based on the number of employees in each company.

The Employee Headcount allocator reflects products and services designed to impact or benefit all TXNM employees. This basis of assignment is described for each Area in Exhibit IV. Employee Headcount is primarily used to allocate costs associated with Benefits, Ethics and Governance, Payroll, People Services, Communications, and related technology utilized by these areas.

Company 6 – PNM General Utility Allocations

Direct Charge Allocations:

There are various employees of the general PNM Utility who work on projects for TNMP Texas. Such services are described in the Services Agreement between PNM and TNMP filed as a Class I transaction on October 9, 2006. To provide the ability to direct charge time spent on such activities, the company has devised allocators that move 100% of charges recorded with these allocators directly to the operating unit benefiting from their work.

The following Locations provide for 100% allocation:

- Location 192 – TNMP-Texas

Allocation Code 192 – TNMP-Texas

Location 192 is a part of the Services Agreement Allocation between PNM and TNMP. 100% of the costs charged to this location are allocated from PNM to TNMP Texas. This method of allocation allows us to provide a direct charge from the corporate level to TNMP Texas while still capturing the appropriate corporate home center that incurred those costs.

Allocation Code 174 - Massachusetts Method (Companies 1, 2)

Allocation Code 174 – Massachusetts Method (Companies 1, 2) is a part of the PNM Common Utility Allocation where expenses incurred by the general PNM Utility (Company 6) are equitably allocated to the operating units (Company 1 – PNM Electric, Company 2 – PNM Transmission)

Allocation rates are based on the Massachusetts Method. This method incorporates employee head count, gross margin (revenues less operating expenses), and net utility plant (plant in service less depreciation) amounts and calculates a composite average of all three.

The costs allocated to PNM Electric Distribution and Transmission, based on the Massachusetts Method, are related to engineering and technology support provided for safe transmission and distribution operations.

PNM
Lead - Lag Analysis
Revenue
Overview

The purpose of the lead-lag analysis for revenue is to determine the average time period between the period in which service is rendered to the customer and the date on which payment is received from the customer. The result of the weighted average lag analysis for revenue is 44.6 days.

Background:

PNM's revenue is comprised of the following primary sources:

- Electric Sales
- Transmission Revenue
- Wholesale
- Miscellaneous / Other Revenue

Of the sources listed above, the three primary drivers for the revenue lag are the Electric Sales, Transmission Revenue, and Wholesale. The other revenue sources, such as Miscellaneous and Other Revenues, include relatively immaterial fees and services such as meter moves and connection/disconnection fees.

For each of the primary drivers, the revenue lag can be segregated into three sub-categories:

- Meter Reading Lag
- Billing Lag
- Collection Lag

Confidential Information for the sole
benefit and use of PwC's Client.

A Per inquiry with Todd Chenault, the 456101 account is to recognize the difference in revenue between a discounted present value calculation of revenue and what is collected monthly on a straight-line basis. It does not affect the invoicing at all, so it shouldn't be included in a comparison to invoiced revenue.

Lead - Lag Analysis
Revenue
Meter Reading Lag

The result of the Meter Reading Lag analysis for Sales was 15.2 days for Electric and Transmission sales and 6.1 days for Wholesale sales.

Background:

The meter reading lag represents the time from when the customer receives service to the day that the meter is read (end of service period). Because service is generally received over a period of time (i.e., a calendar month), the actual meter reading lag is calculated as the midpoint of the service period, assuming that service is received uniformly over the period.

Testing:

- *Electric Sales:* PNM assigns each of its meters into 21 cycles over the month, each of which is read approximately every 30 days. Based upon this methodology, the meter lag is calculated by dividing the number of days in the test period (365) by the applicable monthly midpoints factor (24) (12 months divided by 0.5). The result is 15.2 days.

- *Transmission:* Transmission bills are based on services provided within a calendar month. While transmission sales are provided for on the spot market daily, those sales are billed monthly to customers. It is assumed that the transmission sales are provided equally throughout the month. As such, the meter lag is calculated by summing the midpoint in each applicable test year month and dividing by the number of months (12). The result is 15.2 days.

- *Wholesale:* Wholesale bills are based on services provided within a calendar month. While wholesale sales are provided for on the spot market daily, those sales are billed monthly to customers. It is assumed that the wholesale sales are provided equally throughout the month. As such, the meter lag is calculated by summing the midpoint in each applicable test year month and dividing by the number of months (12). The result is 15.2 days, with the exception of sales with CAISO, which have a different meter reading schedule. Beginning in August 2018, PNM became a scheduling coordinator in the CAISO market which resulted in approximately $72M of revenue from CAISO in 2026. As part of this stream (included within Wholesale), CAISO meters are read every week. As a result, the weekly mid-point is 3.5 days for these customers. The CAISO and non-CAISO wholesale (monthly billing) lags were weighted based on 2026 revenue and combined. This resulted in weighted-average lag days of 6.1 for Wholesale.

Confidential Information for the sole
benefit and use of PwC's Client.

PNM Lead / Lag Study **P-1A**

Meter Reading Lag- Power Sales Sections

Weighted-Average Meter Reading Lag:

Description	Amount	Lag days	Weighted Avg. Lag
CAISO	71,972,809	3.5	2.73
Non-CAISO	20,296,016	15.2	3.34
Total	92,268,826		6.1

Note: The industry average Meter Reading Lag days of 15.2 has been utilized for Non-CAISO customers given there has been no change in the process or customers in 2026. Meters are read weekly for CAISO customers and therefore the total Weighted Average lag days has been calculated on this basis by calculating the weekly mid-point and also based on the relative value of CAISO vs Non-CAISO Power Sales.

Lead - Lag Analysis
Revenue
Billing Lag

The results of the weighted average lag analysis for billing of Electric Sales, Transmission Sales and Wholesale were 4.4 days, 19.4 days, and 11.7 days, respectively.

Background:

The billing lag is the period from the meter reading (end of service period) date until the date that the customer is billed.

- *Electric Sales*: PNM has three different methods of billing its electric sales: traditional system billing, summary billing, and manual billing. System billing relates to those customers whose meter readings are downloaded into Banner (customer revenue billing system), which automatically performs the billing. Summary billed customers are customers with several meter locations. PNM provides a service to these customers whereby the individual bills for each location are accumulated until the bill date of the meter with the latest read date, at which time one bill is sent for all accounts related to the master account. Manual bills do not go through Banner, but instead are manually recorded in the GL and have manual invoices that are created on a monthly basis for select customers.

- *Transmission Revenue*: There are three types of transmission customers: Bilateral, Network and Point-to-Point customers, each with different billing schedules.

- *Wholesale Revenue:* Wholesale revenues are typically billed on a monthly basis, with the exception of sales with CAISO, which has a different billing schedule.

Testing:

- *Electric Sales*: Due to the difference between the three billing processes for electric sales, three approaches were taken to calculate the weighted average billing lag.

    - System Billing - The average billing lag days for system billing was calculated by subtracting the meter date from the billing date for each cycle within each month, and then calculating the average lag days for the population.

      Note: The meter date and billing date was agreed to the Daily Read Schedule obtained from Utility Accounting.

    - Summary Bills - The billing lag for the summary bills was calculated by first identifying the average lag for each customer by averaging the number of days between the meter date and billing date for each sub-account. The weighted average of the individual customer billing lags was then calculated to identify the full billing lag.

      Note: Of the $60.6M of summary bills, approximately 50.65% or $30.7M, was generated by 17 customers. As such, testing was focused on these customers, as adding additional customers to our sample would not have a significant impact on the percentage of total revenues tested since bills are sent a set number of days after meter reads generally across all customers.

Confidential Information for the sole
benefit and use of PwC's Client.

- Manual Bills – The average billing lag for manual bills was calculated by subtracting the meter date from the billing date for the five customers that have manual bills.

  Note: As the population is only comprised of five customers, 100% of the population was tested.

- The System Billing, Summary Billing and Manual Billing, billing lags were then multiplied by their respective sales revenue, summed and divided by total Electric Sales to yield the weighted average billing lag for Electric Sales.

- *Transmission Revenue*: The billing lag for transmission revenue was calculated by identifying the average lag for each customer type (bilateral, network services, and point-to-point) by averaging the number of days between the service end date and billing date for each customer. The weighted average of the individual customer billing lags by customer type, were then calculated and used to identify the full billing lag.

- *Wholesale Revenue*: The billing lag for wholesale revenue was calculated by identifying the average lag for each customer by averaging the number of days between the service end date and billing date for each customer. The weighted average of the individual customer billing lags was then calculated and used to identify the full billing lag. As such, testing was performed over CAISO and Non-CAISO wholesale as each revenue stream within the wholesale revenue has different billing schedule. The billing lags for CAISO and Non-CAISO were then multiplied by their respective sales revenue, summed and divided by total Wholesale sales to yield the weighted average billing lag for Wholesale Revenue.

[a] Refer to tab "R-3B(2) Summary Billing Lag" for further details.

Note: A total of 17 summary bill customers were selected for testing to arrive at over 50% coverage. As such, testing was focused on these customers as adding additional customers to our sample would not have a significant impact on the percentage of total revenues tested.

PNM Lead / Lag Study **R-3B(4)**
Retail Sales Reconciliation

System Bill Revenues	$ 976,467,692	
Summary Bill Revenues	60,594,019	a
Revenues per Banner	1,037,061,711	
Manual Bills	150,679,238	b
Total Revenues	1,187,740,949	
Electric Sales Revenue per GL	1,187,740,949	
Variance	-	c
	0.0%	

a Relates to the summary bills. Refer to Schedule R-3B Summary Bill Days for calculation of billing lag for summary bills.

b Relates to revenues from Intel, Freeport McMoran, Solar Direct, Bueno Foods and Greater Kudu. Refer to schedule R-3C for testing of billing lag for manual bills.

c Note that remaining difference between the population provided and the TB is immaterial and would not have an immaterial impact on the lead lag procedures.

Confidential Information for the sole benefit and use of PwC's Client.

PNM Lead / Lag Study **T-2**
Billing Lag- Transmission Revenue

	Description	Revenue Amount	Billing Lag	Weighted Avg. Lag
[a]	Bilateral	$ 5,979,657	23.9	0.8
[b]	Point to Point	132,576,567	18.5	14.4
[c]	Network	32,206,394	22.2	4.2
[d]	Other	-	-	-
[e]	Total	$ 170,762,618		19.4

[a] Represents total Bilateral Sales per the detail at tab "T- 2B Transmission Detail". Refer to tab "T-2A Transmission Billing" for more details.

[b] Represents total Point to Point Sales per the detail at tab "T-2B Transmission Detail". Refer to tab "T-2A Transmission Billing" for more details.

[c] Represents total Network Sales per the detail at tab "T- 2B Transmission Detail". Refer to tab "T-2A Transmission Billing" for more details.

[d] Represents total 'Other' Transmission Sales per the detail at tab "T- 2B Transmission Detail". It is noted that this category Transmission Revenue includes accounting adjustments which are non-recurring in nature and immaterial for purposes of the lead lag study. As such, this category is not factored into the study, as any lead/lag would not be representative of future transmission revenue transactions. Refer to tab "T-2A Transmission Billing" for more details.

[e] Represents total Wheeling Revenue per revenue per the P&L, refer to tab "TB".

a Note: For Network Transmission Revenue, each month the budgeted revenue amount is recorded and the following month a true-up is made for the actual revenue amount (i.e, a budget of July revenue is recorded in July, any difference between the actual invoice and the budget is recorded in August). As such, the amounts by counterparty per month above will not agree with the invoice selected. However, the differences will be immaterial.

[x] Selections from which sampling has been performed. Refer to T-2A for details.

Note: Detail Listing above provided by Todd Chenault, Utilities Accounting

A Per discussion with Todd Chenault, there isn't a way to only pull by account number from the trial balance and have it equal the transmission revenue, since the tax and expense account numbers have many different items coded to them. Therefore, see the reconciliation which includes the other JE IDs that get the two sources to reconcile.

A Other JE IDs

Lead - Lag Analysis
Revenue
Collection Lag

The results of the weighted average lag analysis for collection of Electric Sales, Transmission sales and Wholesale were 22.3, 37.1 and 16.6 days, respectively.

Background:

The collection lag is the period from the date which the customer is billed until the date the payment is received and can be calculated using one of two methods: Sampling Approach or the Turnover Approach. The Turnover Approach is calculated by dividing the daily revenue requirement by revenue category into the average monthly accounts receivable balance by revenue category. The Sample Approach, which is used in situations where the client records preclude the use of the Turnover Approach, selects a sample of customer bills and identifies the period between the billing date and payment is received.

Testing:

The Turnover Approach, which is the preferable method as it avoids sampling risk due to the large population size and haphazard payment methods by customers, was used in this analysis for the Electric Sales, Transmission and Wholesale. Additionally, from scanning the collection details, there were no significant outliers from the population as a whole that would preclude using the turnover approach.

- *Electric Sales*: The average collection lag for Electric Sales was calculated by dividing the net average accounts receivable by the average daily billings. These two amounts were calculated as follows:

    - The net average accounts receivable balance was calculated by subtracting the average allowance for doubtful accounts from the average monthly accounts receivable balance. Both the average allowance for doubtful accounts and the average monthly accounts receivable balance was calculated by summing the test period monthly balances and dividing by the number of months applicable, because daily reports were not available.

    - The average daily billings was calculated by first summing annual revenue, miscellaneous revenue, and sales tax to compile gross revenue. All of the items used to calculate gross revenue were included to be consistent with the components included with the average Monthly accounts receivable balances (i.e., the receivable balance is the sum of outstanding customer bills, miscellaneous services, and applicable taxes). Gross revenue was then divided by the number of days within a year (365) to identify average daily billings.

  Note: The monthly allowance for doubtful accounts and accounts receivable balances was agreed to the balances on Monthly AR schedules provided by Todd Chenault, Utility Accounting Manager. In addition, the annual revenue, miscellaneous revenue, and applicable taxes were also agreed to the trial balance provided.

- *Transmission Revenue*: The average collection lag for Transmission Revenue was calculated by dividing the net average accounts receivable by the average daily billings. These two amounts were calculated as follows:

Confidential Information for the sole
benefit and use of PwC's Client.

- The average accounts receivable balance was calculated by summing the test period monthly balances and dividing by the number of months applicable, because daily reports were not available (note: there is no allowance for doubtful accounts on transmission revenue). Noted, the monthly A/R outstanding balance is calculated using the A/R aging schedules to identify the billed balances at each month end date.

- The average daily billings amount was calculated by first summing annual revenue, miscellaneous revenue, and sales tax to compile gross revenue. All of the items used to calculate gross revenue were included to be consistent with the components included with the average monthly accounts receivable balances (i.e., the receivable balance is the sum of outstanding customer bills, miscellaneous services, and applicable taxes). Gross revenue was then divided by the number of days within a year (365) to identify average daily billings.

Note: The monthly accounts receivable balances were traced and agreed to the balances on Monthly AR schedules provided by Todd Chenault. In addition, the annual revenues were also agreed to the trial balance provided.

- *Wholesale*: The average collection lag for Wholesale Revenue was calculated by dividing the net average accounts receivable by the average daily billings. These two amounts were calculated as follows:

  - The average accounts receivable balance was calculated by summing the test period monthly balances and dividing by the number of months applicable, because daily reports were not available (note: there is no allowance for doubtful accounts on wholesale revenue).

  - The average daily billings was calculated by first summing annual revenue, miscellaneous revenue, and sales tax to compile gross revenue. All of items used to calculate gross revenue were included to be consistent with the components included with the average monthly accounts receivable balances (i.e., the receivable balance is the sum of outstanding customer bills, miscellaneous services, and applicable taxes). Gross revenue was then divided by the number of days within a year (365) to identify average daily billings.

  Note: The monthly accounts receivable balances were traced and agreed to the balances on Monthly AR schedules provided by Todd Chenault. In addition, the annual revenue was also agreed to the trial balance.

PNM
Lead - Lag Analysis
O & M Expenses
Overview

The purpose of the lead-lag analysis for operating and maintenance is to determine the average time period between the dates that the goods or services are received by the company to the date the invoices are paid.

Background:

PNM's operating and maintenance costs are made up of the following primary categories:

- Fuel Expense
- Payroll
- Taxes Other Than Income
- Allocated Charges
- Income Taxes
- Other O & M Expenses

Most of these items above have been addressed individually, and in detail, under their respective sections.

For non-cash items, no specific analysis was performed, and the balances were excluded for the purposes of compiling the composite weighted average.

PNM
Lead - Lag Analysis
Fuel Expenses
Fuel Purchases - Overview

The purpose of the lead-lag analysis for fuel purchases is to determine that average time period between the production periods and the date the invoices are paid. The result of the weighted average lead analysis for total fuel purchases is 39.6 days.

Background:

PNM's fuel purchases can be segregated into the following categories:

- Coal Purchases
- Gas Purchases
- Purchase Power
- Nuclear Lease
- Transmission Expense

These items are addressed individually with respect to their unique service receipt and cash settlement terms in the subsequent sub-sections.

Based upon the composition of the derivatives and hedging activities, which includes items such as estimated purchases and realized gains/losses on derivative instruments, the nature of the working capital effect of these items were excluded from our study as they are prohibited by the fuel clause and PNM can only receive reimbursement from customers for such charges after it has been approved by the Commission.

Confidential Information for the sole
benefit and use of PwC's Client.

Lead - Lag Analysis
Fuel Expenses
Coal Purchases

The result of the weighted average lead analysis for coal purchases is 32.5 days.

Background:

PNM purchases all coal for its Four Corners Generation Plant. The joint owners of this plant will then reimburse PNM for their portion. Coal is included in the lead lag study under the base stock theory, which is consistent with the historical approach applied to the study.

Testing:

A listing of all coal purchases for the location, for the test period ended June 30, 2026, was obtained from Bobby Sparks. Copies of these invoices were used to calculate the average weighted lead days.

For this analysis, it is assumed the coal is expensed when received (compared to when burned) and is received throughout the month (not in one shipment). The total lead days for the coal purchases was calculated by using the midpoint of the respective invoice (receipting) periods with the number of days from the end of that invoiced period to the payment clear date. The total lead days of each payment was then multiplied by the total invoice amount (adjusted to include only PNM's share) to arrive at the "dollar-days lead". The total dollar-days lead was divided by the total invoice amounts to yield the weighted average lead days.

As part of the process to validate that there were no changes in 2026, Bobby Sparks, Fuels-Operations Accounting Manager, was interviewed to validate that key systems, contractual arrangements, and payment terms have not changed since the study performed for the period ended December 31, 2023, and no future changes are expected at this time.

Based on the discussion with Bobby Sparks, it was noted that the San Juan facility was closed in September 2022. Therefore, coal purchases for San Juan are no longer applicable relative to the test period ending June 30, 2026. As such, the weighted average lead days was recalculated for the test period ending June 30, 2026. The calculation resulted in lag days of 32.5. As such, the 2026 lag days of 32.5 for coal has been utilized.

PNM Lead / Lag Study

C-5

Coal Detail to TB Reconciliation

The following reconciliation was obtained from Bobby Sparks to reconcile the coal purchases to the expense per

Variance Explanation-Coal	Four Corners		Total	PwC Note
Per Detail at C-3	41,794,545	C-3	41,794,545	
General ledger (7/25-6/26)	40,341,399		40,341,399	
Variance	1,453,146		1,453,146	[a]

[a] Variance relates to timing differences between the Four Corners coal payment detail and coal expense recorded per the TB. Adjustments primarily relate to offsets to inventory as the expense is recorded at the time the materials are used. Per discussion with Bobby Sparks, coal costs are accrued in the period incurred and generally paid in the following month; therefore, the payment detail includes invoice/payment activity that does not fully align to current-period expense recognition. The detail includes monthly Four Corners coal invoices and a $13.4M shortfall/liquidated damages invoice included in the July 2026 payment, covering the 6/1/25–5/31/26 period. Bobby noted that an estimated June accrual was recorded to account 501000 and captured in the TB; however, not all invoiced/payment amounts are expensed in the same period. Accordingly, the remaining variance is attributable to accrual/payment timing and inventory/expense recognition differences between the invoice detail and the TB.

Confidential Information for the sole benefit and use of PwC's Client.

PNM
Lead - Lag Analysis
Fuel Expenses
Gas Purchases

The result of the weighted average lead analysis for gas purchases is 42.3 days.

Background:

PNM purchases gas to fuel its generation plants. Natural gas expense is included in the lead lag study under the base stock theory, which is consistent with the historical approach applied to the study.

Testing:

A listing of all gas purchases, for the test period ended June 30, 2026, was obtained. A sample of these invoices was used to calculate the average weighted lead days. (Note: For the each of the selected items, the respective invoices and the payment register was agreed to the initial query.)

For this analysis, it is assumed the gas is expensed when received (compared to when burned) and is received throughout the month (not in one shipment). The total lead days for the gas purchases was calculated by using the midpoint of the respective invoice (receipting) periods with the number of days from the end of that invoiced period to the payment clear date. The total lead days of each payment was then multiplied by the total invoice amount to arrive at the "dollar-days lead." The total dollar-days lead was divided by the total gas expense to yield the weighted average lead days.

[a] Agreed to PeopleSoft Accounts Payable "Detailed Payment History by Vendor" Report. From this report, a separate test of 16 samples were made to agree the payment date to the payment support (ACH/Wire detail and bank statement). No discrepancies were noted with the date of payment per the report.

Note: 57 selections were made to obtain a 90% confidence level as the population is made up of approximately 316 items.

PNM Lead / Lag Study
Gas Purchases by Vendor by Month
For The Period Ending June 30, 2026

Variance

[x] Refer to tab G-1 Gas Expense Lead for testing

[a] Per discussion with Melinda Ortega, PNM Accounting, the Gas Purchases detail was adjusted to include account 456300 – Gas Actual of $10,339,178. Gas invoices are recorded in arrears and include actual gas charges that offset previously recorded gas estimates; therefore, inclusion of the Gas Actual account is necessary to align the invoice-based population with the gas expense recorded in the trial balance. After including this adjustment and compensating tax, the remaining variance was considered immaterial.

Note: Monthly Gas Purchases detail was obtained from Melinda Ortega, PNM Accounting. Through conversations with Melinda Ortega, PNM Accounting, the price of gas purchases has turned negative

immaterial Noted that amount was immaterial for further investigation. Per discussion with Melinda Ortega, PNM Accounting, these accounting entries relate to various true-ups, accruals, settlement, and gas tax back bill and should be excluded from the population. In addition, the value of these accounting entries are immaterial and would therefore have no impact on the lead days calculation.

PNM
Lead - Lag Analysis
Fuel Expenses
Purchased Power

The result of the weighted average lead analysis for Purchased Power was 39.8 days.

Background:

Purchased Power represents those costs incurred by PNM to buy power to meet its system requirements. PNM receives regular invoices from vendors for power purchased but for some vendors will create a manual bill. As such, the population for purchased power was segregated between regular bills and manual bills.

Testing:

The purchased power detail for the test period ended June 30, 2026, was obtained. For purchased power from CAISO, a sample of weekly invoices was used to calculate the average weighted lead days. A total of 53 invoices were selected for testing to obtain 90% confidence level. For regular bills, a sample of these invoices was used to calculate the average weighted lead days. A total of 63 invoices were selected for testing to obtain a 90% confidence level. For manual bills, 100% of the population was used to calculate the average weighted lead days as there was only one primary vendor used for manual billing. A total of 12 invoices were selected for testing. (Note: For the each of the selected items, the respective invoices and the payment register was agreed to the initial query.)

The total lead days for the Purchased Power was calculated by summing the midpoint of the service period (calendar month) and the number of days from the end of that month to the payment clear date. The total lead days of each payment was then multiplied by the total invoice amount to arrive at the "dollar-days lead". The total dollar-days lead days was divided by the total invoice amounts to arrive at the weighted average lead days.

[a] Agreed to PeopleSoft Accounts Payable "Detailed Payment History by Vendor" Report. From this report, 16 samples were made to agree the payment date to the payment support (ACH/Wire detail and bank statement). No discrepancies were noted with the date of payment per the report.

[b] Agreed to client prepared purchased power detail. See schedules "P-3", "P-4" and "P-5" for details.

[c] Selection was in a net receivable position; therefore, PNM invoiced the counterparty and a vendor payment date was not applicable. The billing lag from the end of the applicable service period to the invoice date was used in place of payment lead days for the lead-lag calculation.

[d] Per discussion with Rita Nunez and Rochelle Benally, the selected June purchased power items represent estimated accruals recorded for the applicable production month rather than finalized vendor billings. Because the underlying transactions had not yet been invoiced or paid as of the date the support was prepared, an invoice number and actual payment date were not available. Accordingly, the estimated due date was used as a for the payment date in calculating payment lead days.

[e] Per discussion with Rita Nunez and Rochelle Benally, CAISO selections marked [e] represent month-end accruals or ad hoc entries generated from PCI data rather than finalized invoices or completed cash payments. The related amounts may later be incorporated into a subsequent CAISO settlement invoice, including prior-period true-ups or resettlements, and the actual timing may vary. Because no finalized invoice, actual payment date, or bank reference was available for these selections, the invoice and bank-reference fields are shown as N/A. The amounts shown in the support columns were agreed to the client-provided accrual or accounting detail and are not invoice or bank-statement amounts. For the lead-lag calculation, an estimated settlement-date proxy equal to 14 calendar days after the applicable period end, adjusted to the next business day when the date fell on a weekend, was used based on the typical expected settlement timing discussed with the client

[a] Agreed to PeopleSoft Accounts Payable "Detailed Payment History by Vendor" Report. From this report, 16 samples were made to agree the payment date to the payment support (ACH/Wire detail and bank statement). No discrepancies were noted with the date of payment per the report.

[b] Per review, the invoiced balances for January, February, and March 2026 did not agree exactly to the corresponding monthly amounts in the Manual Bills Detail on P-4. Per Todd Chenault, PNM Accounting, the monthly differences result from PNM recording estimated purchased-power expense at month-end when the actual invoice is not yet available and subsequently reversing or trueing up the estimate once the actual invoice is received in the following month. Accordingly, the differences reflect timing between the production month and the accounting posting month rather than an unreconciled test-period variance. The total invoiced balance for the test period agreed to the Manual Bills Detail at $12,846,810.

[x] Selections made for which samples have been chosen. Refer to "P-2" for details.

[a] Per discussion with Rita Nunez, the amounts associated with project XMNSREV3 were excluded from the CAISO population because they represent reversal entries related to EESC work orders, rather than separate purchases of power. These entries reverse previously recorded EESC activity and therefore do not represent incremental CAISO expense. Including them in the population would distort the population by capturing both the original EESC activity and its related reversal.

[b] The Purchased Power Detail was reconciled to the applicable trial balance accounts, resulting in a remaining variance of $6,181,252. Per discussions with Rita Nunez at PNM, PwC worked through the available population detail and related reconciling items, and this was the lowest variance that could be achieved using the support provided. The remaining difference is considered immaterial to the purchased power population and was therefore excluded from the lead-lag study.

[x] Selections made from which sampling was performed. Refer to "P-2" for details.

[a] Per conversation with Rita C. Nunez, PNM, the decrease in CAISO purchased power for the 2025–2026 study period is primarily attributable to lower forward purchases as compared to 2022–2023. Rita noted that San Juan was shut down in 2022, forward purchases were a significant driver of higher purchased power activity in 2022–2023, and forward purchases declined in 2025–2026 due to new resources, including solar and battery resources.

PNM
Lead - Lag Analysis
Fuel Expenses
Nuclear Lease Expense

The result of the weighted average lead analysis for nuclear lease expense was 0 days.

Background:

Per discussion with Mr. Sparks, the two lease agreements for Palo Verde were terminated and the ownership shares were sold (Unit 1 terminated in January 2023 and Unit 2 terminated in January 2024). No future expense is expected related to Nuclear lease expense. As such, there are no lag days associated with Nuclear lease expense for the 2026 study.

PNM
Lead - Lag Analysis
Fuel Expenses
Transmission Expense

The result of the weighted average lead analysis for transmission expense was 44.5 days.

Background:

Transmission expense represents those costs incurred by PNM for transmission services in delivering power outside of PNM's control area. These costs are assessed monthly based on either a flat fee or rate per MW.

Testing:

The transmission expense detail for the test period ended June 30, 2026, was obtained and a sample of these invoices was used to calculate the average weighted lead days. A total of 42 invoices were selected for testing to obtain a 90% confidence level as the population is made up of approximately 108 items. (Note: For the each of the selected items, the respective invoices and the payment register was agreed to the initial query.)

The total lead day for each payment was calculated by summing the mid-point of respective service period with the number of days from the end of the service period to the payment clear date. The total lead days of each payment was then multiplied by the transmission expense for that period to arrive at the "dollar-days lead." The dollar-days lead was then summed and divided by the total transmission expense to identify the weighted average lead days.

[a] Agreed to PeopleSoft Accounts Payable "Detailed Payment History by Vendor" Report. From this report, 16 samples were made to agree the payment date to the payment support (ACH/Wire detail and bank statement). No discrepancies were noted with the date of payment per the report.

[b] Note: For Transmission Expense, each month the budgeted expense amount is recorded and in the following month when the actual expense amount is recorded, the original budgeted amount is reversed (i.e., a budget of July expense is recorded in July, and in August the actual July expense will be recorded and the original July budgeted expense will be reversed). As such, the amounts by counterparty per month above will not agree with the detail. However, the differences will be immaterial.

[c] Per Todd Chenault, the selected item relates to an EIM credit issued through TEP's allocation and settlement process. As EIM amounts are reconciled and trued up at various settlement intervals, including T9, T11, and T70, credits may be issued when recalculations indicate amounts are due to PNM. For this item, TEP paid the credit directly to PNM rather than netting it against PNM's current-month invoice payment; therefore, no PNM payment date exists and collection days were recorded as zero.

[d] These payments were either not made or did not clear the bank by the time of our study. As such, expected payment due dates were used for those payments not issued.

Note: 42 selections were made to obtain a 90% confidence level as the population is made up of approximately 108 items (i.e., monthly counterparty invoices).

[a] Through conversations with Todd Chenault, the table above shows the actual invoice expense for each service month, while the GL may include estimates and subsequent true-ups. Accordingly, PwC obtained the EOM Support columns which were populated from each monthly EOM workbook's "Final Expense" and include "Other" adjustments where populated (SPP Estimate and EPE Refund Amortization).

Lead - Lag Analysis
O & M Expenses
Payroll - Overview

The purpose of the lead-lag analysis for payroll is to determine the average time period between the date services are received from employees and the date paychecks are paid. The overall weighted average lead days is presented in two categories: 1) Salaries & Wages and 2) Payroll Taxes. The overall weighted average lead days for salaries and wages is 19.2 days and the overall weighted average lead days for payroll taxes is 21.5 days.

Background:

The payroll system covers seven inter-companies of PNM Resources Inc., and payment is made on the same date for all of PNMR. Payroll expenses of employees who offer services to several companies are directly charged to each company. In addition to direct charges, other expenses are allocated based on the allocation schedule that is annually amended.

The PNM portion consists of the following two components:

A) Payroll that is charged directly to companies 1, 2 & 3
B) Allocations from Company 6 that offer delivery services to the Electric Utility

	July 1, 2025 - June 30, 2026	Percentage	Expense
Companies 1, 2, & 3 (Electricity)	Direct charge	100%	A
Company 6 (Electricity)	Allocation	[a]	B

[a] See P-4 within the Payroll testing file, where the allocation percentages are located.

Payroll expense, within the main two categories, consists of nine sub-categories:

- Salaries & Wages
  - Net Pay to Employees *
  - 401(k) and MESP Savings Deductions*
  - Medical Insurance Deductions*
  - Other Deductions

- Payroll Taxes
  - Federal Taxes Withholding *
  - FICA Taxes Withholding *
  - State Taxes Withholding *
  - Federal Unemployment Taxes (FUTA) *
  - State & Local Unemployment Taxes (SUTA) *

* These items above have been addressed individually, and in detail, under their respective sections.

Based upon the composition of Other Deductions, which include items such as ESPP withholdings, United Way withholdings, gym membership withholdings, etc., these items were not deemed material for individual analysis and are assumed to carry similar lead terms with the categories highlighted for testing.

16					
17	Weighted Average Lead Days			19.2	

[a] Per review of the allocation details tested in the Allocations Lead, the employee and employer deductions for medical insurance plans are funded through the monthly allocations to PNMR Services Co. As such, the average lead days calculated for allocations (30.2 days) is applied to these expenses.

[b] Per review of the allocation details tested in the Allocations Lead and review of the payments to the third party vendor, the employee and employer deductions for 401K and MESP paid to Vanguard are funded through the monthly allocations to PNMR Services Co. As such, the average lead days calculated for allocations (30.2 days) is applied to these expenses.

[c] Based on calculation from the client, approximately 34% of payroll expenses are capitalized. This amount is 34% of Gross Pay.

PNM
Lead - Lag Analysis
O & M Expenses
Payroll - Net Pay

The result of the weighted average lead analysis for net payroll is 13.9 days.

Background:

Per discussion with Shelia Mulligan, Payroll Manager, the payroll cycle for both salaried and hourly employees is two weeks. The payroll runs from Saturday to the second following Friday. The payday is the Friday following the pay period, with the exception of a holiday. If a holiday falls on or a day before the Friday following the pay period, the payday will be the business day before the holiday. The payment of overtime is paid in the same manner as regular pay.

The Company has two payroll accounts (#6511005719, 6510001917) at Wells Fargo. Employees can choose how to receive their payroll either ACH transfer or checks will be available for pickup from each of the PNM facilities. Approximately 99.29% of the employees use direct deposit and the remaining 0.71% receive paychecks available for pick up at each of the PNM facilities. Funds are transferred to the bank on Wednesday following the end of the pay period, and the transaction becomes effective on Friday. Paychecks are generated and mailed out on Wednesday evening following the pay period; the date of these checks is the actual payday. For purposes of this analysis, it is assumed that payroll checks are cashed on the respective pay dates.

Testing:
The total lead days for the net pay was calculated by summing the midpoint of the respective pay periods with the number of days from the end of that pay period to the payment clear date. The total lead days of each payment was then multiplied by the net pay amount to arrive at the "dollar-days lead". The total dollar-days lead was divided by the total payroll expense amount to yield the weighted average lead days.

Note: Net pay amounts used in the calculation equaled 100% of Companies 1, 2, & 3 results. Additionally, the respective portion of Companies 1, 2, & 3 net pay allocations of the shared service company (Company 6) were included in the calculations. (The allocation percentages of Company 6 costs for Companies 1, 2, & 3 were 68%, 32%, & 0%, for 2025, and 71%, 29%, & 0% for 2026, respectively.)

PNM
Lead - Lag Analysis
O & M Expenses
Payroll - 401(k) and MESP Savings Plan Deductions

The result of the weighted average lead analysis for 401(k) and MESP Savings Plan deductions is 30.2 days.

Background:

Based upon participation rights and elections filed with the Company's Human Resource Department, certain amounts are withheld from the employee's checks and remitted on their behalf to the 401(k) and MESP Savings Plan. Per discussion with Shelia Mulligan, Payroll Department, the MESP Savings payments are remitted to Vanguard via wire transfers on the Wednesday following payday. The amount that is paid includes:

	Deductions from Employees' Gross Pay
	The Company Contribution
+	The Company Contribution Matching Portion
	Total Amount Wired

These amounts are remitted by PNMR Services Co. (co. 7) and then reimbursed by PNM (co. 6) through the monthly allocation.

Testing:

As the expenses are paid out by PNM through the allocations, the lead days of 30.2 as tested for the allocation has been utilized for the weighted average lead days for 401K and MESP deductions.

Note: Net pay amounts used in the calculation equaled 100% of Companies 1, 2, & 3 results. Additionally, the respective portion of Companies 1, 2, & 3 net pay allocations of the shared service company (Company 6) were included in the calculations. (The allocation percentages of Company 6 costs for Companies 1, 2, & 3 were 68%, 32%, & 0%, for 2025, and 71%, 29%, & 0% for 2026, respectively.)

benefit and use of PwC's Client.

PNM
Lead - Lag Analysis
O & M Expenses
Payroll - Medical Insurance Deductions

The result of the weighted average lead analysis for Medical Insurance Deductions is 30.2 days.

Background:

These deductions are for the medical insurance plans, in particular the health plans with Presbyterian and Blue Cross Blue Shield. These deductions are paid out by the PNMR Services Co. (co. 7) and then billed back to PNM (co. 6) through the monthly allocation.

Testing:

As the expenses are paid out by PNM through the allocations, the lead days of 30.2 as tested for the allocation has been utilized for the weighted average lead days for medical insurance deductions.

Confidential Information for the sole
benefit and use of PwC's Client.

PNM
Lead - Lag Analysis
O & M Expenses
Payroll - Federal and FICA Taxes Withholdings

The result of the weighted average lead analysis for federal tax withholdings and FICA withholdings is 17.0 days and 17.1 days respectively.

Background:

Based upon elections filed on the employee's Form W-4, certain income tax amounts are withheld from the employee's checks and remitted on their behalf to the federal government.

The payments for Federal Taxes Withholding, FICA-Employee, FICA-Employer, OASDI - Employee and OASDI-Employer are all paid via EFTPS (Electronic Federal Tax Payment System) bi-weekly for all the PNM entities. The payment date for Federal taxes is Monday of the second week following the pay period.

Testing:

The total lead days for the federal taxes withholdings was calculated by summing the midpoint of the respective pay periods with the number of days from the end of that pay period to the actual payment date. The total lead days of each payment was then multiplied by the respective withholdings amount to arrive at the "dollar-days lead". The total dollar-days lead was divided by the total expense amount to yield the weighted average lead days.

Note: Net pay amounts used in the calculation equaled 100% of Companies 1, 2, & 3 results. Additionally, the respective portion of Companies 1, 2, & 3 net pay allocations of the shared service company (Company 6) were included in the calculations. (The allocation percentages of Company 6 costs for Companies 1, 2, & 3 were 68%, 32%, & 0%, for 2025, and 71%,29%, & 0% for 2026, respectively.)

PNM
Lead - Lag Analysis
O & M Expenses
Payroll - State Taxes Withholdings

The result of the weighted average lead analysis for state tax withholdings is 47.3 days.

Background:

Based upon elections filed on the employee's Form W-4, certain income tax amounts are withheld from the employee's checks and remitted on their behalf to the state government.

State Taxes Withholdings are due on the 25th of the following month. The payments are remitted via ACH (Automated Clearing House) typically the week prior to the due date, for all the PNM entities. The amount that is paid includes:

	Total Gross Receipts Tax
	Compensating Tax
+	State Withholding Tax
	Total Amount Wired

Testing:

The total lead days for the state taxes withholdings was calculated by summing the midpoint of the respective pay periods with the number of days from the end of that pay period to the actual payment date. The total lead days of each payment was then multiplied by the respective withholdings amount to arrive at the "dollar-days lead". The total dollar-days lead was divided by the total expense amount to yield the weighted average lead days.

Note: Net pay amounts used in the calculation equaled 100% of Companies 1, 2, & 3 results. Additionally, the respective portion of Companies 1, 2, & 3 net pay allocations of the shared service company (Company 6) were included in the calculations. (The allocation percentages of Company 6 costs for Companies 1, 2, & 3 were 68%, 32%, & 0%, for 2025, and 71%, 29%, & 0% for 2026, respectively.)

PNM
Lead-Lag Analysis
Taxes Other Than Income
Payroll – FUTA and SUTA Taxes

The result of the weighted average lead analysis for FUTA and SUTA taxes are each 69.2 and 68.6 respectively.

Background:

PNM is required to pay the employer portion of Federal Unemployment Tax (FUTA) and State Unemployment Tax (SUTA). FUTA and SUTA taxes are paid on a quarterly basis.

Testing:

The total lead day for each payment was calculated by summing the mid-point of respective taxable period with the number of days from the end of the taxable period to the payment clear date. The total lead days of each payment was then multiplied by the tax payment to arrive at the "dollar-days lead." The dollar-days lead was then summed and divided by the total tax obligation to identify the weighted average lead days.

FUTA and SUTA tax obligations were agreed to the tax payment schedule and PeopleSoft payment detail. The PeopleSoft payment detail was validated through an accept/reject test in which 16 samples from the detail were agreed to the applicable bank statements.

PNM
Lead-Lag Analysis
Taxes Other Than Income
Overview

The purpose of the lead-lag analysis for taxes other than income taxes is to determine the average number of days between when the tax obligation is incurred and the date the tax invoice is paid. The result of the weighted average lead analysis for taxes other than income is 83.8 days.

Background:

PNM is subject to a variety of federal, state, and municipal taxes other than income taxes; the largest of which are:

- Ad Valorem Taxes
  - Arizona Ad Valorem
  - New Mexico Ad Valorem
- Native American Taxes
- New Mexico Supervision & Inspection Taxes
- Gross Receipts Taxes
- Franchise Taxes
- Other Misc. TOITs – i.e., Compensating Use Taxes

Each of these items is addressed individually, and in detail on the subsequent subsections.

In addition to the items listed above, PNM is also responsible for additional immaterial tax obligations other than income (both individually and in the aggregate). For these immaterial items, no specific analysis was performed; however, the balances were included for purposes of compiling the composite weighted average.

PNM
Lead-Lag Analysis
Taxes Other Than Income
Ad Valorem Tax

The result of the weighted average lead analysis for ad valorem taxes was 236.4 days. The result of the weighted average lead analysis for Arizona and New Mexico ad valorem taxes was 213.5 and 239.3, respectively.

Background:

PNM must pay property taxes to the counties in which it owns property. The obligation is based upon the property's taxable value on the lien date (January 1 of the tax year) multiplied by the respective school district's tax rate (i.e., the 12/31/25 plant assessment is used to calculate the 2026 property tax).

PNM receives New Mexico tax bills at the end of October for taxes due pertaining to that particular year (i.e., tax bills received in October 2025 relate to the full fiscal year 2025 property tax obligations). The payment is made in two installments: the first half of the payment is due December 10th of the current year; the second half is due May 10th of the following year. If the total tax due in a given county is less than $50,000, PNM will generally pay the balance in a single payment on December 10th.

Similar to New Mexico, PNM receives Arizona tax bills in September for taxes due pertaining to that particular year. The payment is made in two installments: the first half is due November 1 of the current year, and the second half is due May 1 of the following year. Maricopa County is the only payment that is split into two installments. All other counties are paid by November 1.

Testing:

The total lead day for each payment was calculated by summing the mid-point of respective taxable period with the number of days from the end of the taxable period to the payment clear date. The total lead days of each payment was then multiplied by the tax payment (partial or full, as applicable) to arrive at the "dollar-days lead." The dollar-days lead was then summed and divided by the total tax obligation to identify the weighted average lead days. As the test period for the 2026 study ended 6/30/26, the first payment for the 2026 year was not made as of the time of the study. As a result, an estimate of the expense and payment date was used for the December expected payment.

Note: The tax obligations were agreed to the ad valorem tax assessments for each county, as well as the PeopleSoft payment detail. The PeopleSoft payment detail was validated through an accept reject test in which 16 samples from the detail were agreed to the applicable bank statements. In addition, because the second payments were not made by time of the study, the payment due dates and budgeted tax amounts were used.

[a] All property taxes are assessed on an annual basis per Melissa Martinez, Tax Department.

[b] Reflects check clear date for second payments of FY 2025 assessment. Check clear dates were vouched to the PeopleSoft payment detail. The PeopleSoft payment detail was validated through an accept reject test in which 16 samples from the detail were agreed to the applicable bank statements. Due to timing, first payments of the FY 2026 assessment were not cleared prior to the current study. As such, payment due dates were utilized.

[c] Expense amounts traced and agreed to county tax payments. Due to timing, ad valorem assessments for 2026 were not available at the time of the current study thus half of the 2026 budgeted property tax expense was utilized.

[d] As the FY26 ad valorem assessments were not available at the time of the current study, the 2026 budgeted property tax expense was utilized.

[e] Noted an immaterial difference between the expense noted and the amount paid. The difference is immaterial and would have no impact on the overall lead days calculation.

[f] As the Ad Valorem taxes are assessed on a calendar year, which differs from our test year, the weighted average lead days was calculated by applying the applicable test year proration to the calendar year expense (i.e., 50% for FY 2025 & 50% for FY 2026).

[g] Per conversation received from Melissa Martinez, Tax Department, PNM was required to pay three 2025 Bernalillo County property tax bills in full before the normal May 10, 2026 due date because certain parcels required replatting in Bernalillo County. PwC obtained the client-prepared schedule, which separates the total Bernalillo County tax expense between PNM and PNMR Services Company and identifies the applicable payment checks.

PNM's total 2025 Bernalillo County property tax expense was $16,786,870.29; accordingly, the calculated second-half expense was $8,393,435.15. The PNM portions of the related second-half payments were $2,060,572.84 under check no. 265597, $1,251,446.38 under check no. 265854, and $5,081,416.64 under check no. 266210, totaling $8,393,435.86.

Note: The population of disbursements for Ad Valorem Taxes for New Mexico during the test period was provided by Melissa Martinez, Tax Department. In general, PNM receives New Mexico tax bills at the end of October for taxes due pertaining to that particular year (i.e., tax bills received in October 2025 relate to the full fiscal year 2025 property tax obligations). The payment is made in two installments: the first half of the payment is due December 10th of the current year; the second half is due May 10th of the following year. If the total tax due in a given county is less than $50,000, PNM will generally pay the balance in a single payment on December 10th. The largest 9 counties were sampled, which resulted in coverage of 90% of the population. The remaining untested amounts are deemed immaterial and would not significantly alter the results of procedure performed.

PNM
Lead-Lag Analysis
Taxes Other Than Income
Native American Tax

The result of the weighted average lead analysis for Native American taxes was 51.4 days.

Background:

Similar to ad valorem taxes, the Native American taxes are annual and semi-annual tax obligations related to property which PNM owns on Native American land. The obligation is based upon the property's taxable value on the lien date, which can vary depending on the tax ordinance for each pueblo or tribe. The taxable value is multiplied by the respective tribe's or pueblo's tax rate.

The payment due dates vary by tribe or pueblo.

Testing:

The total lead day for each payment was calculated by summing the mid-point of respective taxable period with the number of days from the end of the taxable period to the payment clear date. The total lead days of each payment was then multiplied by the tax payment to arrive at the "dollar-days lead." The dollar-days lead was then summed and divided by the total tax obligation to identify the weighted average lead days.

Note: The tax obligations was agreed to the Native American tax assessments for each tribe or pueblo, as well as the PeopleSoft payment detail. The PeopleSoft payment detail was validated through an accept reject test in which 16 samples from the detail were agreed to the applicable bank statements.

PNM
Lead-Lag Analysis
Taxes Other Than Income
New Mexico Supervision & Inspection

The result of the weighted average lead analysis for New Mexico supervision and inspection taxes was negative 25.5 days.

Background:

PNM is required to pay the New Mexico Public Utility Commission an annual supervision and inspection fee. This fee is for monitoring, guidance, and review services that the PUC provides.

The fee is calculated at roughly one half of 1% (or .005) of PNM's prior fiscal year's net receipts. Payments for these obligations are due by July 31 of the respective tax year.

Testing:

The total lead day for the payment was calculated by summing the mid-point of taxable period with the number of days from the end of the taxable period to the payment clear date. The total lead days of payment was then multiplied by the tax obligation to arrive at the "dollar-days lead." The dollar-days lead was then divided by the total tax obligation to identify the weighted average lead days.

Note: The tax obligations were agreed to the New Mexico supervision and inspection tax calculation, as well as the PeopleSoft payment detail. The PeopleSoft payment detail was validated through an accept reject test in which 16 samples from the detail were agreed to the applicable bank statements.

Confidential Information for the sole
benefit and use of PwC's Client.

5									
6	**Weighted Average Lead Days**								(25.5)

[a] Traced and agreed to the tax year and obligation to the tax assessment.

[b] Reflects check clear date. Check clear dates were vouched to the PeopleSoft payment detail. The PeopleSoft payment detail was validated through an accept reject test in which 16 samples from the detail were agreed to the applicable bank statements.

[c] As the New Mexico Supervision and Inspection Taxes are assessed on a calendar year, which differs from our test year, the weighted average lead days were calculated by applying the applicable test year proration to the calendar year expense (i.e., 50% for FY 2025 & 50% for FY 2026).

[d] Per confirmation and support provided by Melissa Martinez, the payment timing changed from the April 1 date used in prior studies due to a legislative change effective in 2026. Under N.M. Stat. § 62-8-8, the inspection and supervision fee is payable on the last day of July each year. Accordingly, 7/30/2026 was used as the payment clear date for the 2026 lead-lag calculation based on the actual ACH payment support.

Confidential Information for the sole benefit and use of PwC's Client.

PNM
Lead-Lag Analysis
Taxes Other Than Income
Gross Receipts Taxes

The result of the weighted average lead analysis for gross receipts taxes was 38.7 days.

Background:

PNM must pay a gross receipts tax to the state of New Mexico for regulated sales. The taxable rate for this obligation is based upon the various rates applicable in the counties in which these sales occur. In general, the rate currently is between 5.25% and 9.45% of gross receipts.

Gross receipts are due on the 25th of the month following the month the revenue was earned.

Testing:

The total lead day for each payment was calculated by summing the mid-point of respective taxable period with the number of days from the end of the taxable period to the payment clear date. The total lead days of each payment was then multiplied by the tax payment to arrive at the "dollar-days lead." The dollar-days lead was then summed and divided by the total tax obligation to identify the weighted average lead days.

Note: The tax obligations were agreed to the Gross Receipts calculation, as well as the PeopleSoft payment detail. The PeopleSoft payment detail was validated through an accept reject test in which 16 samples from the detail were agreed to the applicable bank statements.

[a] Gross receipts, Compensating Use and NM State WH taxes are assessed and paid on a monthly basis on the CRS-1 Long Form per Melissa Martinez, Tax Department.

[b] Traced and agreed to the PeopleSoft payment detail. The PeopleSoft payment detail was validated through an accept reject test in which 16 samples from the detail were agreed to the applicable bank statements.

[c] Note that additional gross receipts tax related to San Felipe were deemed immaterial for individual testing. They did not yield a material impact to the overall lead calculation.

[d] Note that NM state withholding taxes are tested as part of the Payroll Taxes Lead Study (see schedule P-2C). They are included within this schedule for purposes of agreeing to the total payment related to these expenses and no lead for the NM state withholdings are calculated within the schedule above.

Confidential Information for the sole benefit and use of PwC's Client.

PNM
Lead-Lag Analysis
Taxes Other Than Income
Franchise Tax

The result of the weighted average lead analysis for franchise taxes was 46.2 days.

Background:

PNM pays a franchise tax to the municipalities in which regulated sales occur. The standard amount due to the various municipalities is generally 2% or 3% of gross revenues, less bad debt expense.

The frequency of the payments varies with each municipality (i.e., certain municipalities require annual, semi-annual, quarterly or monthly remittances); however, each payment is generally due on the 10th of the month following the end of the period.

Testing:

The total lead days for each payment was calculated by summing the mid-point of respective taxable period with the number of days from the end of the taxable period to the payment clear date. The total lead days of each payment was then multiplied by the tax obligation for that period to arrive at the "dollar-days lead." The dollar-days lead was then summed and divided by the total tax obligation to identify the weighted average lead days.

The municipalities selected for testing represented 94.4% of the total population. For the remaining immaterial franchise tax items, no specific analysis was performed; however, the balances were included at the calculated weighted average for their billing schedule (i.e., monthly, or quarterly) for purposes of compiling the composite weighted average.

Note: The tax obligations were agreed to the franchise tax calculations for each municipality, as well as the PeopleSoft payment detail. The PeopleSoft payment detail was validated through an accept reject test in which 16 samples from the detail were agreed to the applicable bank statements.

[a] Note that there was only one city billed semi-annually for franchise fees. Refer to Schedule T-5a for details.
[b] Note that seven cities were selected for quarterly billed franchise fee testing. Refer to Schedule T-5b for details.
[c] Note that the five largest of the monthly billed cities were selected for testing. Refer to Schedule T-5c for details.
[d] Note that the remaining amounts related to quarterly and monthly billed franchise fees were deemed immaterial for individual testing. Therefore, the weighted average applicable to the billing cycle (i.e. quarterly or monthly) as calculated in the respective schedules was applied to the remaining amounts to arrive at the overall weighted average lead days.

PNM
Lead-Lag Analysis
Taxes Other Than Income
Compensating Use Tax

The result of the weighted average lead analysis for compensating use taxes was 38.8 days.

Background:

Items purchased outside the state that have not paid a gross receipt tax are subject to a compensating use tax. The taxable rate for this obligation is currently between 5.12% and 9.07% of the purchase.

Compensating use taxes are due on the 25th of the month following the month the obligation was incurred.

Testing:

The total lead day for each payment was calculated by summing the mid-point of respective taxable period with the number of days from the end of the taxable period to the payment clear date. The total lead days of each payment was then multiplied by the tax payment to arrive at the "dollar-days lead." The dollar-days lead was then summed and divided by the total tax obligation to identify the weighted average lead days.

Note: The tax obligations were agreed to the compensating use tax calculations, as well as the PeopleSoft payment detail. The PeopleSoft payment detail was validated through an accept reject test in which 16 samples from the detail were agreed to the applicable bank statements.

[a] Gross receipts, Compensating Use and NM State WH taxes are assessed and paid on a monthly basis on the CRS-1 Long Form per Melissa Martinez, Tax Department.

[b] Traced and agreed to the PeopleSoft payment detail. The PeopleSoft payment detail was validated through an accept reject test in which 16 samples from the detail were agreed to the applicable bank statements.

[c] Note that additional gross receipts tax related to San Felipe were deemed immaterial for individual testing. They did not yield a material impact to the overall lead calculation.

[d] Note that NM state withholding taxes are tested as part of the Payroll Taxes Lead Study (see schedule P-2C). They are included within this schedule for purposes of agreeing to the total payment related to these expenses and no lead for the NM state withholdings are calculated within the schedule above.

PNM
Lead - Lag Analysis
O & M Expenses
Allocated Charges

The result of the weighted average lead days for allocated charges was 30.2 days.

Background:

PNM Resources Inc., similar to many utility holding companies, has a service company that produces economies of scale for services provided to the various operating units, including its electric units. The services provided by the service company include accounting, planning, and certain IT functions, etc.

As such, each month Business Unit 6 (the corporate element of the electric utility) receives a bill from Business Unit 7 (the service company) and Business Unit 12 (TNMP) for their portion of allocated charges for the previous month. Amounts allocated include applicable charges for Companies 1, 2, 3, and 6, which comprise the electric business units. The bill is comprised of three parts: 1) "Direct" charges that are 100% allocated to each Company based on expenses specifically incurred by that Company, 2) "Transactional" charges which are allocated to each Company based on the number of respective transactions for that Company (e.g., the number of JEs or invoices), and 3) "Allocated" charges which are based on each Company's pro-rata share that month of service company costs, based on Direct and Transactional charges. Note: the executive compensation expense will be excluded from the total population as this amount is excluded from the study. Similar to a third-party invoice, these charges must then be settled with a cash transfer from Business Unit 6's bank account to Business Unit 7 or 12's bank account.

As such, the approach for the purposes of this analysis will be to address these charges as if Business Units 7 and 12 were third-party vendors providing various services to the consolidated electric utility (Note: This approach appears consistent with the accounting approved and used for regulatory reporting).

	Weighted Average Lead Days									**30.2**

[a] The transfer date per the Cash Disbursement Request represents the date cash was transferred between Company 6 and Company 7. Each transfer was agreed to the applicable bank statement.
[b] Calculated the lead days as the midpoint of the billing period (number of days in billing period / 2) plus the number of days until payment is made.
[c] Agreed the expense amount to the invoice for the respective months. Please note that the expense balance shown represents Company 6's net cash balance based on cash inflows/outflows. Amounts invoiced on a monthly basis are in excess of the expense amount to be included in the cash working capital calculation. This is due to the fact that certain charges (i.e. executive compensation allocations) are billed to the utility monthly, but such charges are not applicable to the working capital calculation.
[d] Obtained the Executive Compensation expense per month from Yvette Griego, PNM Corporate Accounting.

Confidential Information for the sole benefit and use of PwC's Client.

PNM
Lead - Lag Analysis
Income Taxes

The purpose of the lead-lag analysis for income taxes is to determine the average time period between the dates that the federal income tax obligation is incurred by the company to the date the payments are made. The result of the weighted average lead days for income taxes was 37.4 days.

Background:

For the current income tax lead, the Company will use the statutory federal income tax payment schedule. Under this schedule, estimated quarterly payments are required on 4/15, 6/15, 9/15 and 12/15. This schedule mirrors the state income tax payment schedule.

Deferred income taxes are deducted from utility rate base at the time they are charged to expense and are therefore assigned a zero lead since recording these expenses does not provide a cash working capital benefit to PNM. The customer receives the benefit of a reduced cost of service while the investor is compensated through the equity return component of operating income.

PNM is not planning to include deferred income tax expense or ITC within the determination of working capital for the 2026 electric case. Although theoretically correct, such an approach has been used in previous New Mexico rate cases and they have not been successful.

Testing:

PNM is in a Net Operating Loss (NOL) position as of 6/30/2026 and made no tax payments for the twelve months ended 6/30/2026. Based on forecast, the assumption used is that PNM will begin to pay income tax expense beginning in FY'26. As such, the projected payment dates are based on the statutory due date of the quarterly tax payments as the Company has historically paid taxes on the due date.

The total lead days for the income taxes was calculated by summing the midpoint of service periods and the number of days from the end of that service period to the due date. The total lead days of each transfer was then multiplied by the percentage due to arrive at the "weighted lead days." The total weighted lead days was summed to arrive at the weighted average lead days.

10								
11	**Weighted Average Lead Days**							**37.4**

[a] Taxes are paid quarterly, per Tax Department
[b] For this calculation, the statutory date when federal income taxes payments are due was used, although no actual payments were made for the base year.

Note: PNM is in a Net Operating Loss (NOL) position as of 6/30/26 and made no tax payments for the 12 months ended 6/30/26. The above projected payment dates are based on the statutory due date of the quarterly tax payments as the Company has historically paid these on the due date.

PNM
Lead - Lag Analysis
O & M Expenses
Other O & M Expense

The results of the weighted average lead days for Other Operations and Maintenance were (0.4) days and 5.3 days for Four Corners and Palo Verde, respectively, and 38.0 days for NAES and all other O&M expenses.

Background:

After considering all significant categories of operating and maintenance expenses, such as Payroll, Pensions and Benefits, Taxes Other Than Income Taxes, and Income Taxes, remaining expenditures generally have a similar make-up. As such, costs such as insurance, supplies, third-party performed repairs, etc. are accumulated and addressed in total. There are also Allocated Charges, paid out by PNMR Services Company, however, these charges are addressed separately and are not included in O&M expense testing.

Testing:

A PeopleSoft detailed query of expense items and a GL detail report of all O&M expense accounts was obtained for the test period. The expenses related to the categories of payroll, fuel expenses, allocated charges, income taxes, and taxes other than income were excluded from the population of the report as they are tested separately elsewhere. The overall population was then subdivided into three locations:

- Four Corners
- Palo Verde
- All Other O&M

The primary vendor comprising the population related to Four Corners is the Arizona Public Service Company ("APS"). Noted that the billing cycle for APS with Four Corners includes monthly cash payments based on estimated expenses, plus a true up of previous month's estimated payments to actual expenses. Therefore, to cover the period for these invoices, each of the monthly invoices during the period was selected.

The primary vendor comprising the population related to Palo Verde was also APS, but the structure of the billing cycle is slightly different. Noted that billing cycle for APS with Palo Verde includes weekly cash payments based on estimated expenses for the following week. For the invoice for the last week within the month, a true up is calculated comparing the sum of the weekly estimate payments during the prior month and the actual expenses incurred for that prior month. Therefore, to calculate the lead related to this vendor, each of the forty-eight weekly invoices within the test period, including those with the monthly true-ups, were selected.

For the remaining Other O&M Expenses, a sub-population was identified for one significant vendor, NAES Corporation, which also had a unique billing cycle. NAES estimates and bills the next month's total O&M expenses during the current month, as well as billing in the current month the true-up of the prior month's actual expenses. As this billing and payment cycle is unique to this vendor within the All Other O&M population, the expenses related to this vendor were segregated and tested individually. Twelve samples were made to obtain coverage over 95.5% of bills of this nature. In order to obtain a confidence level of 90% over the remaining O&M population, sixty-nine items were haphazardly selected for a total of sixty-nine samples for the test period ended June 30, 2026. Of the sixty-nine items, 10 selections were made to include the impact of expenses paid by credit card.

Confidential Information for the sole
benefit and use of PwC's Client.

Also, PNM uses MUFG as its corporate credit card carrier. Payments are made automatically by MUFG drafting from PNM's account for the payment period. The transactions from the 26th of one month to the 25th of the following month constitute one payment period, for which MUFG auto-drafts the payment on the 1st day of the following month. PNM provided a payment date for each MUFG credit card transaction. An average was based on the data for the payments throughout the test period and applied to the credit card selections in the above noted populations. The average lead for the MUFG payments was 22.55 days.

The total lead days for the other O & M expenses was calculated by summing the midpoint of respective service periods, as applicable, with the number of days from the end of that service period to the payment clear date. The total lead days of each payment was then multiplied by the total invoice amount to arrive at the "dollar-days lead." The total dollar-days lead was divided by the total invoice amounts to yield the weighted average lead days.

[a] Period covered represents the service period of the invoice. Each period was agreed to the respective invoice.
[b] Payment clear dates were agreed to the PeopleSoft Accounts Payable Detailed Vendor Payment Register. For checks, the date paid is the date the check cleared the bank.
[c] Expenses were agreed to the respective invoices.
[d] The MUFG items noted are payments made for credit card charges. As the payments are made automatically by MUFG drafting from PNM's account, an average was used for the total lead. The average was based on the data for the payments. See tab Oa - MUFG Data, where a summary of the testing is located.
[e] The underlying service period for this invoice occurred outside the study period. However, the related payment date fell within the scoped testing period. Accordingly, the item was included in the O&M expense lead testing based on the timing of the cash

	Weighted Average Lead Days									**(17.7)**	

[a] Period covered represents the service period of the invoice. Each period was agreed to the respective invoice.

[b] Payment clear dates were agreed to the PeopleSoft Accounts Payable Detailed Vendor Payment Register.

[c] Expenses were agreed to the respective invoices.

[d] Note that this expense has a service period which extends prior to or past our test year. As such, the weighted average lead days was calculated by applying the applicable test year proration to the calendar year expense.

[e] Noted that billing cycle for NAES Corporation includes monthly cash payments based on estimated expenses and a true up of the previous month's estimated payments to actual expenses. This true up can result in either additional expense being owed for that period or a credit for overpayment of expenses which is then taken against the current period estimate. In order to appropriately calculate the impact of this billing cycle on the overall weighted average lead days, the absolute value of the invoiced items has been taken in order to appropriately reflect the weighting percentage to be applied to each item. As noted within [f] below, the credits that are actually lag days have been appropriately adjusted back to the negative lead days within the dollar lead day calculation. The result is to appropriately weight the expense items but still capture the impact of the billing cycle on the overall average lead days.

[f] Noted that this invoiced item was a credit based on the difference between estimated expenses and actual results. As the expense is related to a credit, the result would be a calculated lag as opposed to a calculated lead. To appropriately reflect this lag within the overall weighted average lead days, the dollar lead days has been appropriately adjusted to be a negative dollar lead days.

Note: In order to obtain sufficient coverage of the NAES Vendor invoices, selections of 12 were made in order to cover 95.5% of the total test year population.

	Weighted Average Lead Days									**(0.4)**	

[a] Period covered represents the service period of the invoice. Each period was agreed to the respective invoice.

[b] Payment clear dates were agreed to the PeopleSoft Accounts Payable Detailed Vendor Payment Register. For checks, the date paid is the check date.

[c] Expenses were agreed to the respective invoices. Noted, we have excluded estimates and true-ups included in each invoice that are not within the testing period from 7/1/2025 - 6/30/2026 to appropriately reflect this lag.

[d] Noted that billing cycle for APS with Four Corners includes monthly cash payments based on estimated expenses and a true up of the previous month's estimated payments to actual expenses. This true up can result in either additional expense being owed for that period or a credit for overpayment of expenses which is then taken against the current period estimate. In order to appropriately calculate the impact of this billing cycle on the overall weighted average lead days, the absolute value of the invoiced items has been taken in order to appropriately reflect the weighting percentage to be applied to each item. As noted within [e] below, the credits that are actually lag days have been appropriately adjusted back to the negative lead days within the dollar lead day calculation. The result is to appropriately weight the expense items but still capture the impact of the billing cycle on the overall average lead days.

[e] Noted that this invoiced item was a credit based on the difference between estimated expenses and actual results. As the expense is related to a credit, the result would be a calculated lag as opposed to a calculated lead. To appropriately reflect this lag within the overall weighted average lead days, the dollar lead days has been appropriately adjusted to be a negative dollar lead days.

Note: The O&M monthly bills with Arizona Public Service Company includes the total O&M estimate for that month and the true up using actual expenses from prior months. As such, the monthly bills from July 2025 through June 2026 were selected in order to obtain coverage over the full test year. In order to obtain sufficient coverage of Four Corners O&M expenses, each invoice from Arizona Public Service Company was selected in order to cover 100% of the total test year population.

PNM **O3**
Operating Expenses - Other O&M Palo Verde

Line No.	Vendor Name	RFF #	Period Covered [a]	Mid-Point	Payment Clear Date [b]	Payment Lead Days	Total Lead Days	Expense [c]	Absolute Value Expense [d]	Dollar Lead Days
	Total							62,917,569	89,710,178	475,553,899
	Weighted Average Lead Days									**5.3**

[a] Period covered represents the service period of the invoice. Each period was agreed to the respective invoice.
[b] Payment clear dates were agreed to the PeopleSoft Accounts Payable Detailed Vendor Payment Register. For checks, the date paid is the check date.
[c] Expenses were agreed to the respective invoices.
[d] Noted that billing cycle for APS with Palo Verde includes weekly cash payments based on estimated expenses and a monthly invoice which compares estimated payments to true actual expenses. This true up can result in either additional expense being owed for that period or a credit for overpayment of expenses which is then taken against the current period estimate. In order to appropriately calculate the impact of this billing cycle on the overall weighted average lead days, the absolute value of the invoiced items has been taken in order to appropriately reflect the weighting percentage to be applied to each item. As noted within [e] below, the credits that are actually lag days have been appropriately adjusted back to the negative lead days within the dollar lead day calculation. The result is to appropriately weight the expense items but still capture the impact of the billing cycle on the overall average lead days.

[e] Noted that this invoiced item was a credit based on the difference between estimated expenses and actual results. As the expense is related to a credit, the result would be a calculated lag as opposed to a calculated lead. To appropriately reflect this lag within the overall weighted average lead days, the dollar lead days has been appropriately adjusted to be a negative dollar lead days.

Note: The O&M monthly bills with Arizona Public Service Company includes the total O&M estimate for that month and the true up using actual expenses from prior months. As such, the weekly bills from July 2025 through June 2026 were selected in order to obtain coverage over the full test year. In order to obtain sufficient coverage of Palo Verde O&M expenses, each invoice from Arizona Public Service Company was selected in order to cover 100% of the total test year population.

Confidential Information for the sole benefit and use of PwC's Client.

MUFG - Auto Draw Dates **Ob**
Prepared based on Nature of MUFG Auto Draws

Note: Per Sheila Mulligan, AP Supervisor, and Jaime Lowery, Project Manager, typically the transactions from the 26th of one month to the 25th of the following month constitutes one payment period, for which MUFG auto-drafts the payment in the next two weeks. As such, the test year was divided into the below payment cycles and the payment date assigned is based on the actual transaction date that cash was withdrawn from Wells Fargo bank account *5727. The payment dates on tab "Oa-MUFG Data " were provided by PNM with the MUFG data.

Year	Payment Cycle	Payment Date
2025	6/26-7/25	8/1/2025
2025	7/26-8/25	9/1/2025
2025	8/26-9/25	10/1/2025
2025	9/26-10/25	11/1/2025
2025	10/26-11/25	12/1/2025
2025	11/26-12/25	1/1/2026
2025/2026	12/26-1/25	2/1/2026
2026	1/26-2/25	3/1/2026
2026	2/26-3/25	4/1/2026
2026	3/26-4/25	5/1/2026
2026	4/26-5/25	6/1/2026
2026	5/26-6/25	7/1/2026
2026	6/26-7/25	8/1/2026

O&M Population

Note that the below table shows the population of all O&M expenses, sub-divided into four groupings: Palo Verde, Four Corners, Estimated Bill Payment vendors and All Other O&M. PwC obtained the PeopleSoft disbursement listing from Shelia Mulligan, AP Supervisor. Also, PwC has obtained the YTD O&M transactions for accounts between '500000' and '999999' / All Details Query Expense that ties back to the trial balance. Refer to further description below on which accounts, cost types, and location types which were excluded from the population.

Location - Testing		Amount
Four Corners	A	22,409,278
Palo Verde	B	62,917,569
Estimated Bill Vendors	C	26,972,142
All Other		65,103,296
Grand Total O&M	D	**177,402,285**
		PP

to tab "OS - Other O&M Summary"

A The balance of the Four Corners O&M population was determined by obtaining the "PS Disbursements 07.01.2025 to 06.30.2026" reports showing all expenses paid through PeopleSoft and Maximo. The "PS Disbursements 07.01.2025 to 06.30.2026" report was obtained from Sheila Mulligan, AP Supervisor. Once the listing was obtained, data per the reports for companies 1, 2, 3, and 6 were aggregated into each respective tab denoted by 0006-0001 and so forth within the listing. As O&M expenses related to the Four Corners are in Company 3, PwC used 0006-003 tab to apply the following filters to determine the amount of O&M expenses related to Four Corners:

1) The "Fund" column was filtered on fund 715 only, as the identifier shows data related strictly to Four Corners.
2) The "Account" column was filtered on account 232012 only as this account listed relates to O&M expenses. (Note - fuel purchases from Arizona Public Service Company were also excluded from these accounts, as fuel is subject to testing within the Fuel Expense Lead).

Once the filters listed above were appropriately applied to the data, a pivot table was created to show O&M expense by vendor, as well as specific invoice reference numbers for each vendor invoice. From here, the population of O&M expense for Four Corners was determinable, which is shown in the table above.

B The balance of the Palo Verde O&M population was determined by obtaining the "PS Disbursements 07.01.2025 to 06.30.2026" report showing all expenses paid through PeopleSoft and Maximo. The "PS Disbursements 07.01.2025 to 06.30.2026" report was obtained from Sheila Mulligan, AP Supervisor. Once the listing was obtained, data per the reports for companies 1, 2, 3, and 6 were aggregated into each respective tab denoted by 0006-0001 and so forth within the listing. As O&M expenses related to the Palo Verde are in Company 3, PwC used 0006-003 tab to apply the following filters to determine the amount of O&M expenses related to Palo Verde:

1) The "Fund" column was filtered on funds 720 - 724 only, as these identifiers show data related strictly to Palo Verde.
2) The "Account" column was filtered on accounts 232015, 232051, 517000, 556000, 921000, 923000, and 924000 only, as these were the only accounts listed that relate to O&M expenses.

Once the filters listed above were appropriately applied to the data, a pivot table was created to show O&M expense by vendor, as well as specific invoice reference numbers for each vendor invoice. From here, the population of O&M expense for Palo Verde was determinable, which is shown in the table above.

C The balance of the Estimated Bill Vendor O&M population was determined by obtaining the "PS Disbursements 07.01.2025 to 06.30.2026" report showing all expenses paid through PeopleSoft and Maximo. The "PS Disbursements 07.01.2025 to 06.30.2026" report were obtained from Sheila Mulligan, AP Supervisor. Once the listing was obtained, data per the reports for companies 1, 2, 3, and 6 were aggregated into each respective tab denoted by 0006-0001 and so forth within the listing. As O&M expenses related to the estimated bill vendors are in Company 3, PwC used 0006-003 tab to apply the following filters to determine the amount of O&M expenses related to Estimated Bill Payment vendors:

1) The "Fund" column was filtered on funds 744, 746, and 747 only, as these identifiers show data related strictly to Estimated Bill Vendors.
2) The "Account" column was filtered on accounts 165000, 165025, 500000, 512000, 546000, 553000, 923000, 924000, and 925004 only, as these were the only accounts listed that relate to O&M expenses.

Once the filters listed above were appropriately applied to the data, a pivot table was created to show O&M expense by vendor, as well as specific invoice reference numbers for each vendor invoice. From here, the population of O&M expense for Estimated Bill Vendors was determinable, which is shown in the table above.

D The 'Grand Total' of O&M expenses was determined by obtaining the YTD O&M transactions for accounts between '500000' and '999999' / All Details Query Expense that ties back to the trial balance. The listing was obtained from Sheila Mulligan, AP Supervisor. Once the listing was obtained, data per the report was filtered as described below in order to determine the amount of total O&M expenses for the study period:

1) Business Units 1, 2, 3, and 6 are included as the business units are subject to the lead lag study.
2) Excluded all accounts with string 922****, as accounts are allocations and have been considered through the allocation lead testing.
3) Excluded accounts 925998 and 926998, as accounts amounts relate to allocations for injuries and damages (925998) and pension & benefit allocations (926998).
4) Excluded account 928000, as the regulatory commission expense for efficiency rider is accounted for under a separate rider and is not to be included for recovery in the cash working capital lead lag study.
5) Excluded Accounts 926000, 926006, 926039, 926040, 926042, 926043, 926045, 926051, and 926053 as medical plan contributions and retirement benefits are already considered as part of the payroll lead testing.
6) Labor cost types 110, 120, 140, 151, 152, and 153 were excluded, as net pay labor are already considered as part of the payroll lead testing.
7) Accounts 501000, 5010001, 501004, 501200, 501300, 501400, 501401, 501404, 501500, 501600, 501601, 501604, 518000, 525000, 547000, 547100, 547200, 547400, 547700, 555000, 555100, 555400, 5557000, and 565000 were excluded, as they have already been considered in the fuel expense lead testing.
8) Excluded accounts 557001 and 557002, as accounts are non-cash expenses and are not included for recovery in the cash working capital lead lag study.
9) Excluded account 904000 as account relates to the bad debt expense.
10) Excluded account 928005 as account relates to depreciation and is not included for recovery in the cash working capital lead study.
11) Excluded solar location type 755 related to RPS rider as it is not included for recovery purposes.

Once the filters listed above were appropriately applied to the data the population of total O&M expense for all categories was determinable, which is shown as the 'Grand Total' in the table above. In order to arrive at the All Other O&M total population amount, the amounts related to Four Corners, Palo Verde, and Estimated Bill Vendors (amounts determined in tickmarks A - C above) were subtracted from the total per the detail listing / 'Grand Total'. It is also noted that selections made on tab 'O - All Other O&M Testing' are not related to Four Corners, Palo Verde, or Estimated Bill Vendors, as O&M expenses related to these categories were filtered out of the listing based on the "Fund" identifiers described in tickmarks A - C.

Tort	388,628	1,077,868	203,049	1,314,042	1,249,820	745,897
Grand Total	**1,896,087**	**2,418,929**	**1,292,816**	**2,043,014**	**1,720,523**	**1,912,712**

Note 1: Costs reflect historical costs for allowable litigation expenses in the adjusted base period for each respective case, before escalations to the respective test periods or allocations to PNM Retail share.

Note 2: PNM escalated historical allowable litigation expenses from the end of prior rate review base periods to the beginning of current rate review base period, to provide comparative cost estimates in 2025 dollars that would account for inflationary impacts.

Litigation Category Descriptions
Tort Litigation: Includes defense of property damage and personal injury claims against PNM requiring experienced defense counsel and use of commercial practitioners for claims brought by PNM.
FERC Litigation: Includes participation in administrative proceedings for natural gas suppliers for natural gas generating units.
Human Resources Litigation: Includes employment law, labor relations, employment benefits and workers' compensation matters requiring representation from outside counsel.
NMPRC Litigation: Includes litigated proceedings and rulemakings before the New Mexico Public Regulation Commission to seek necessary regulatory approvals, respond to orders of the Commission or participate in proceedings which impact PNM as a regulated public utility.
Commercial Litigation: Includes business and commercial transactions and disputes, environmental matters and other specialized areas as needed to defend or assert PNM's rights and obligations regarding its business activities.

PNM Exhibit RNG – 9

Retirements for Capital Budget

	PNM Exhibit RNG-9
	Retirements for Capital Budget (Notes)
	(1) Location Abbreviations:
	010 - All Distribution Locations
	650 - All Transmission Locations
	046 - Rio Bravo Generating Station (Company 3)
	357 - Bulk Power Building Allocation (Company 3)
	703 - Lordsburg Generating Station (Company 3)
	707 - Afton Generating Station (Company 3)
	713 - Reeves Generating Station (Company 3)
	715 - Four Corners Generating Station (Company 3)
	720 - Palo Verde Nuclear Generating Station All Units (Company 3)
	744 - Luna Generating Station (Company 3)
	752- La Luz Generating Station (Company 3)
	999 - All Corporate Locations (Companies 7 & 8)
	(2) Palo Verde Nuclear Generating Station retirement rates are calculated using a 6 year average to assure complete
	18 month outage cycles are used for all three units
	(3) Forecasted retirements are based on a two-year historical average and the annual amount is converted to a
	monthly forecast.
	(4) Forecasted retirements are projected based on termination of depreciation on an asset.
	(5) Forecasted retirements are based on a five-year historical average and the annual amount is converted to a
	monthly forecast.
	(6) Retirements are adjusted (reduced) relative to the change in PNM's participant interest in 2023.
	(7) Retirements are adjusted (reduced) relative to the change in PNM's participant interest in 2024.
	(8) Retirements are adjusted (reduced) relative to the changes in PNM's participant interest in 2023 and 2024.
	(9) Retirements are reduced for the following by G/L Location/FERC:
	010/362 - $737,000 in 2025 associated with one-time aged spare asset removal.
	650/353 - $4,924,081 in 2025 associated with SVC transformer fire.
	707/344 - $12,172,360 in 2022 associated with replacement of row of turbine blades and stator blades repair.

	Cost of Removal for Capital Budget (Notes)
	(1) Location Abbreviations:
	010 - All Distribution Locations
	650 - All Transmission Locations
	046 - Rio Bravo Generating Station (Company 3)
	703 - Lordsburg Generating Station (Company 3)
	707 - Afton Generating Station (Company 3)
	713 - Reeves Generating Station (Company 3)
	715 - Four Corners Generating Station (Company 3)
	721 - Palo Verde Nuclear Generating Station Unit 1 (Company 3)
	722 - Palo Verde Nuclear Generating Station Unit 2 (Company 3)
	723 - Palo Verde Nuclear Generating Station Unit 3 (Company 3)
	724 - Palo Verde Nuclear Generating Station Common (Company 3)
	725 - Palo Verde Nuclear Generating Station Water Reclamation (Company 3)
	744 - Luna Generating Station (Company 3)
	(2) Adjustments for unusual activity by G/L Location:
	650 - Removes activity associated with Rio Puerco SVC failed transformer projects and
	the Western Spirit acquisition project
	703 - Removes activity associated with reverse osmosis and evaporation pond project
	707 - Removes activity associated with gas turbine rotor replacement
	713 - Removes activity associated with unit 3 GSU transformer replacement
	715 - Removes activity associated with ARO settlement
	721-725 - Adds 2020 activity for Palo Verde Nuclear Generating Station to produce a 6 year
	total to assure complete 18 month outage cycles are used for all locations
	(3) G/L location 010 and 650 rates were increased in anticipation of higher future cost of
	removal activity.

Description of Rate Docket Expenses

Is contained in the following 3 pages.

PNM Exhibit RNG – 11

Description and Support for Rate Case Expenses

Consulting services – Assist with the preparation, development, and litigation of this proceeding.

- Itron trained PNM's Staff and supported the load research and forecasting analysis to develop and prepare usage data for cost allocations and the billing determinants used in this case..
- MCR Performance Solutions develops and sponsors the COST™ Model and Rate Design Model and provides support on PNM's proposed rate design in this case. In addition, MCR is providing written testimony through PNM Witness Cindy Menhorn and Matt Larkin and are expected to provide services responding to discovery regarding the class cost of service study and the proposed rate design.
- Mountain Vector Energy (MVE) provides PNM with assistance and expertise in evaluating the New Mexico Community Solar Program. MVE has helped to develop the benefit-cost analysis model in accordance with the methodology outlined in Docket 23-00071-UT. MVE has also provided ongoing support with the tracking and verification of unsubscribed energy as required by statute.
- Alliance Consulting Group is PNM's outside consultant for performing the Company's depreciation studies and supports the Technical Update to PNM's depreciation rates approved in the 2027 Rate Case that PNM is proposing to implement in this case. In addition, Alliance Consulting Group is providing written testimony in this case through PNM witness Dane Watson and is expected to provide services in responding to discovery regarding questions related to the Technical Update to recently approved depreciation rates and to provide testimony at the hearing in this matter.
- Willis Towers Watson (WTW) provides PNM actuarial services associated with the Company's pension and benefit plans. WTW conducted an actuarial study on PNM's pension and benefit plans for the test period and will assist with responses to associated

discovery .

- PNM has retained Adrien McKenzie, CFA, of FINCAP, Inc., as its ROE and capital structure expert in this case. In any rate case, ROE and capital structure are central points of discussion; therefore, it is necessary to have a witness who supports the complex ROE calculation. PNM does not maintain the in-house expertise required of an ROE witness and must hire a consultant to provide the analysis and testimony in this area of the business. Additionally, there are benefits from an external consultant providing these services, especially if the external consultant is actively engaged in various jurisdictions across the country; this allows PNM to present a broader view of the modeling, data and other information and circumstances central to ROE issues in regard to this area of expertise.
- ScottMadden and Blue Lotus Works LLC assisted with the coordination and documentation of the required capital budget information necessary to support the projected capital additions that are reflected in PNM's cost of service request. PNM's budget and other departments that develop and implement capital projects do not maintain the staffing to develop the data and information necessary for a rate case filing. Therefore, PNM must engage outside consultants to assist in the development of this data and information.

- PwC was retained to develop the lead-lag study as required by the Commission's rules. The lead-lag study was utilized in the development of necessary cash working capital. In addition, PwC is providing support in developing estimates for excess\deficient ADIT and the proper return of these amounts to customers. PwC also reviewed 530 Schedules and Cost of Service Model workpapers for accuracy and consistency by reviewing formulas, totals, references, and cross-referencing amounts between workpapers.
- KPMG performs external auditing services for PNM and was engaged to perform the independent review in this rate case as required 530 17.9.530.13(Q)(6) NMAC.

Outside legal fees incurred as part of this proceeding-

- Outside legal costs are estimated to be $2 million. The two law firms assisting in the case are: Miller Stratvert PA, and Wilkinson Barker Knauer LLP. These firms are retained to: assist in the development of testimony; assure compliance with regulatory law; assist in legal briefings, discovery responses, required notices, and to provide expertise and specific knowledge of New Mexico utility laws, and rate case procedures and requirements.

Other rate case costs -

- Other costs requested in this filing include required postage to mail notices to customers, and newspaper publication costs expected to be incurred under applicable Commission rules and the procedural order issued in this case. Based on previous procedural orders for rate cases, PNM is required, at its sole expense, to include a copy of the Notice of Proceeding and Hearing to be published once in newspapers of general circulation sufficient for availability in every county where PNM provides service. To comply with this requirement, PNM publishes the notice in the *Albuquerque Journal*. For a notice of the size required to inform customers of the scope of the proceedings and the proposed rates and their impacts, the amount of space required in the newspaper is quite large and costly. PNM also is required to mail to each of its customers a copy of the Notice of Proceeding and Hearing, which typically involves significant reproduction and postage costs as the notice is several pages and requires a direct mailing to each customer.

Additionally, transcripts and court reporter costs are incurred during the hearings. These expenses are necessary to comply with the procedural orders in the case and Commission rules.
