(1) Heating and cooling degree days are quantitative indices designed to reflect the demand for energy needed to heat or cool a home or a business and are derived from daily average temperatures. Figures shown use HDD55/CDD65 for PNM and HDD65/CDD65 for TNMP.

(2) Reflects the 20-year average, 1999 to 2018.

Note: Weather station temperature data obtained through NOAA/National Weather Service and Weatherunderground.com
